Stretching lengths of yarn across interior spaces American artist Fred Sandback 1943 2003 created expansive works that underscore the physical presence of the viewer This book the first major study of Sandback explores the full range of his art which not only disrupts traditional conceptions of material presence but also stages an ethics of interaction between object and observer Drawing on Sandback's substantial archive Edward A Vazquez demonstrates that the artist's work with all its physical slowness and attentiveness to place as well as its relationship to minimal and conceptual art of the 1960s creates a link between viewers and space that is best understood as sculptural even as it almost surpasses physical form At the same time the economy of Sandback's site determined practice draws viewers focus to their connection to space and others sharing it As Vazquez shows Sandback's art aims for nothing less than a total recalibration of the senses as the spectator is caught on neither one side nor the other of an object or space but powerfully within it *Isometric Drawing* Alpha Pierce Jamison, 1911 *Drawing from the Modern* Jodi Hauptman, Gary Garrels, Museum of Modern Art (New York, N.Y.), 2004
