Lyons,James

Mayall,2004-09-01 The Universal Declaration for Human Rights was approved in 1948 and yet more than fifty years later some human rights especially the rights of groups such as women minorities and indigenous peoples continue to be at risk This book examines recent humanitarian catastrophes involving such groups and suggests how the society of states may develop a collective capacity for human rights enforcement Above all it emphasizes the long term efforts to stabilize weak or failing societies and to develop democratic governments on which the protection of human rights ultimately depends The Law of Internal Armed Conflict Lindsay Moir,2002-01-03 Laws regulating armed conflict have existed for centuries but the bulk of these provisions have been concerned with wars between states Relatively little attention has been paid to the enormously important area of internal armed conflict At a time when international armed conflicts are vastly outnumbered by domestic disputes this book seeks to redress the balance through a comprehensive analysis of those rules which exist in international law to protect civilians during internal armed conflict From regulations in the nineteenth and early twentieth centuries according to the doctrine of recognition of belligerency this book traces the subsequent development of international law by the Geneva Conventions and their additional Protocols as well as through the more recent jurisprudence of the Yugoslav and Rwandan tribunals The book also considers the application of human rights law during internal armed

conflict before assessing how effectively the applicable law is and can be enforced *Inter-American Yearbook on Human Rights / Anuario Interamericano de Derechos Humanos, Volume 15 (1999)* Inter-American Commission on Human Rights, Inter-American Court of Human Rights, 2024-02-12 The print edition is available as a set of four volumes

Svensson-McCarthy, 2021-09-27 This study demonstrates the extensive protection that international law provides to human rights even in the most serious of emergencies when they are particularly vulnerable Based on a meticulous analysis of preparatory works and practice under the International Covenant on Civil and Political Rights as well as the American and European Conventions on Human Rights and with a special chapter on the International Labour Organisation's approach to international labour standards and emergencies this book shows that respect for the rule of law and the concept of a democratic society are controlling parameters in any valid limitation on the enjoyment of human rights It further shows that respect for human rights and the operation of institutions such as the Legislature and Judiciary are crucial to enabling societies to address and eventually remedy the root causes of emergency situations The study recommends possible directions for the development of case law and suggests some practical means to help ensure that international legal requirements are in fact respected in emergencies *Economic Sanctions as an Instrument of U.S. Foreign Policy* Helen Osieja, 2005 Economic sanctions have been used as an instrument of American foreign policy ever since the Taft administration adopted the Dollar Diplomacy This dissertation analyzes the trade Embargo the United States imposed upon Cuba after the Revolution from different perspectives from the political considering the main guidelines of American foreign policy toward Latin America especially during the Cold War and from the juridical considering different perspectives of customary international law Since the embargo was imposed only after American property had been expropriated without compensation the dissertation analyzes the legality of expropriation seen from the perspective of both capital importing and capital exporting countries and the legality of economic sanctions as a legitimate peaceful reprisal Due to the fact that the American embargo against Cuba is quasi total that is consists of a number of different economic sanctions it is the aim of this dissertation to analyze each of these and finally to assess the effectiveness of economic sanctions as an instrument of foreign policy Many books and articles have been written about this very controversial embargo almost as old as the Cuban Revolution itself For the Cubans it constitutes an economic blockade and a violation of Cuba's right to free trade for the Americans it is a reprisal for the confiscation of American property Nonetheless since the embargo as stated above is not a sanction itself but a number of different economic sanctions it is the aim of this dissertation to analyze each of the sanctions that comprise the embargo and its legality according to customary international law Another aim of this dissertation is to prove why the American embargo against Cuba has only enhanced Castro's power and further centralized it A brief chapter about the economic sanctions the United States imposed upon Chile under President Salvador Allende and the fall of his

regime serves to compare the two cases with some similarities where sanctions were applied in the first without success and in the second with success Finally the dissertation aims to prove that a lifting of the American embargo against Cuba is highly unlikely unless there is a change of regime in that nation of the Caribbean *Accountability of Armed Opposition Groups in International Law* Liesbeth Zegveld, 2002-07-25 Who is accountable under international law for the acts committed by armed opposition groups In today's world the majority of political conflicts involve non state actors attempting to exert political influence such as overthrowing a government or bringing about secession Notwithstanding their impact on the course of events however we often know little about these groups and even less about how to treat their actions legally In this award winning scholarship Liesbeth Zegveld examines the need to legally identify the parties involved when internal conflicts arise and the reality of their demands for rights Her study draws upon international humanitarian law human rights law and international criminal law to consider a fundamental question who is accountable for the acts committed by non state actors or for the failure to prevent or repress these acts This study will be of interest to academics postgraduate students and professionals involved with armed conflict and international relations Customary International Humanitarian Law Jean-Marie Henckaerts, Louise Doswald-Beck, Carolin Alvermann, 2005-03-03 Customary International Humanitarian Law Volume I Rules is a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non international armed conflicts In the absence of ratifications of important treaties in this area this is clearly a publication of major importance carried out at the express request of the international community In so doing this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts The National Aviation System Plan United States.
