how Tepoztecan politics borrows discourses from the Mexican state she then tells how this process shaped local politics in the midst of the contested 1988 national presidential election when local actors elaborated a discourse of democracy as a technique for disciplining gossip and in 1991 when Tepoztecan began to draw on the support of international environmental NGOs Throughout her analysis Martin explores how Tepoztecan politics unfolds in the climate of mistrust first nurtured by the role of the state in local politics and later by the demands of working with U S and Western European environmentalists Martin shows that the politics of loose connections is above all else a style of political participation that has proved adaptive in the contemporary political landscape and that understandings of politics have been dogged by a conception of connections that may well be obsolete in the contemporary world Her study is a balanced re evaluation of Tepoztlán that reveals how politics succeeds through loose connections a strategy that may be instructive for others seeking to survive in either local or global coalitions

Drawings by Alberto Beltrán Oscar Lewis,1951      Robert Redfield and the Development of American Anthropology Clifford Wilcox,2006-01-01 Relying upon close readings of virtually all of his published and unpublished writings as well as extensive interviews with former colleagues and students Robert Redfield and the Development of American Anthropology traces the development of Robert Redfield s ideas regarding social change and the role of social science in American society Clifford Wilcox s exploration of Redfield s pioneering efforts to develop an empirically based model of the transformation of village societies into towns and cities is intended to recapture the questions that drove early development of modernization theory Reconsideration of these debates will enrich contemporary thinking regarding the history of American anthropology and international development

**Kitchenspace** Maria Elisa Christie,2008-08-01 Throughout the world the kitchen is the heart of family and community life Yet while everyone has a story to tell about their grandmother s kitchen the myriad activities that go on in this usually female world are often devalued and little scholarly attention has been paid to this crucial space in which family gender and community relations are forged and maintained To give the kitchen the prominence and respect it merits Maria Elisa Christie here offers a pioneering ethnography of kitchenspace in three central Mexican communities Xochimilco Ocotepc and Tetecala Christie coined the term kitchenspace to encompass both the inside kitchen area in which everyday meals for the family are made and the larger outside cooking area in which elaborate meals for community fiestas are prepared by many women working together She explores how both kinds of meal preparation create bonds among family and community members In particular she shows how women s work in preparing food for fiestas gives women status in their

communities and creates social networks of reciprocal obligation In a culture rigidly stratified by gender Christie concludes kitchenspace gives women a source of power and a place in which to transmit the traditions and beliefs of older generations through quasi sacramental food rites      Revolutionary Parks Emily Wakild,2025-10-28 Winner of the Alfred B Thomas Award Southeastern Council of Latin American Studies Revolutionary Parks tells the surprising story of how forty national parks were created in Mexico during the latter stages of the first social revolution of the twentieth century By 1940 Mexico had more national parks than any other country Together they protected more than two million acres of land in fourteen states Even more remarkable L zaro C rdenas president of Mexico in the 1930s began to promote concepts akin to sustainable development and ecotourism Conventional wisdom indicates that tropical and post colonial countries especially in the early twentieth century have seldom had the ability or the ambition to protect nature on a national scale It is also unusual for any country to make conservation a political priority in the middle of major reforms after a revolution What emerges in Emily Wakild s deft inquiry is the story of a nature protection program that takes into account the history society and culture of the times Wakild employs case studies of four parks to show how the revolutionary momentum coalesced to create early environmentalism in Mexico According to Wakild Mexico s national parks were the outgrowth of revolutionary affinities for both rational science and social justice Yet rather than reserves set aside solely for ecology or politics rural people continued to inhabit these landscapes and use them for a range of activities from growing crops to producing charcoal Sympathy for rural people tempered the radicalism of scientific conservationists This fine balance between recognizing the morally valuable if not always economically profitable work of rural people and designing a revolutionary state that respected ecological limits proved to be a radical episode of government foresight      **Strange Reciprocity** Sidney S. Perutz,2008-01-01 Women of Tepoztl n were among the first New Spain labor forces to have their continuum of paid and unpaid work processes globally feminized Focusing on the transformational 1990 to 2000 period this book moves across time space and organizational changes to make explicit multitasking women s experiences of turning to their advantage development policies and practices systematically loaded against them from the outside in and the inside out
