## **Terragni Danteum:**

**The Danteum** Thomas L. Schumacher, 1993 In 1938 Mussolini's Fascist government commissioned the team of Giuseppe Terragni and Pietro Lingeri to design the Danteum a temple to the greatest of Italian poets In this acclaimed book Thomas Schumacher traces Terragni's fanatical often mystical pursuit of the poet and explains how this unbuilt project succeeds as an architectural translation of the Divine Comedy one that mirrors the poem in structure theme and rhythm Original sketches and renderings complement Schumacher's analysis and provide a complete record of the Danteum The Danteum is a beautifully presented book that invites us to study the Danteum in its entirety The book demonstrates that architecture can transcend the realm of the physical Schumacher's Danteum brings together different moments of history into one timeless and universal whole Progressive Architecture The most penetrating study of Terragni's architecture to appear in English to date The fact that the Danteum was conceived as both a monument to the Divine Comedy and a transformation of a literary work into architectural form makes it a particularly appropriate vehicle for investigating structural parallels in different media and excellent presentation of a provocative project JSAH *Dante's Bones* Guy P. Raffa, 2020-05-12 Like a saint's relics Dante's bones have been stolen exhumed and worshiped Guy Raffa narrates the Florentine poet's hereafter the physical afterlife of the writer who vividly imagined the spiritual afterlife In the story of the bones lies the tale of Dante's evolution from Renaissance to Italian to nationalist hero and finally global icon **Architecture Re-assembled** Trevor Garnham, 2013-04-26 Beginning from the rise of modern history in the eighteenth century this book examines how changing ideas in the discipline of history itself has affected architecture from the beginning of modernity up to the present day It reflects upon history in order to encourage and assist the reader in finding well founded principles for architectural design This is not simply another history of architecture nor a history of histories Setting buildings in their contemporaneous ideas about history it spans from Fischer von Erlach to Venturi and Rossi and beyond to architects working in the fallout from both the Modern Movement Aalto Louis Kahn Aldo van Eyck and Post modernism such as Rafael Moneo and Peter Zumthor It shows how Soane Schinkel and Stirling amongst others made a meaningful use of history and contrasts this with how a misreading of Hegel has led to an abuse of history and an uncritical flight to the future This is not an armchair history but a lively discussion of our place between past and future that promotes thinking for making **Computer-Aided Architectural Design. Future Trajectories** Gülen Çağdaş, Mine Özkar, Leman Figen Gül, Ethem Gürer, 2017-06-20 This book constitutes selected papers of the 17th International Conference on Computer Aided Architectural Design Futures CAAD Futures 2017 held in Istanbul Turkey in July 2017 The 22 revised full papers presented were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on modeling urban design support systems for design decisions studying design behavior in digital environments materials fabrication computation shape studies

**The Hero Building** Johnny Rodger, 2016-03-09 Why was it that across Scotland over the last two and a half centuries

architectural monuments were raised to national heroes Were hero buildings commissioned as manifestations of certain social beliefs or as a built environmental form of social advocacy And if so then how and why were social aims and intentions translated into architectural form and how effective were they A tradition of building architectural monuments to commemorate national heroes developed as a distinctive feature of the Scottish built environment As concrete manifestations of powerful social and political currents of thought and opinion these hero buildings make important statements about identity the nation and social history The book examines this architectural culture by studying a prominent selection of buildings such as the Burns monuments in Alloway Edinburgh and Kilmarnock the Edinburgh Scott Monument the Glenfinnan Monument and the Wallace Monument in Stirling They give testimony to how a variety of architectural forms and styles can be adapted through time to bear particular social messages of symbolic weight This tradition which literally allows us to dwell on important social issues of the past has been somewhat neglected in serious architectural history and heritage and indeed one of the main monuments has already been destroyed By raising awareness of this rich architectural and social heritage while analysing and interpreting the buildings in their historical context this book makes an exciting and original scholarly contribution to the current debates on identity and nationality taking place in Scotland and the wider UK

**Diagramming the Big Idea** Jeffrey Balmer, Michael T. Swisher, 2012 As a beginning design student you need to learn to think like a designer to visualize ideas and concepts as well as objects In this book Balmer and Swisher illustrate how you can create and use diagrams to clarify your understanding of both particular projects and organizing principles and ideas

**The Ultimate Italian** Fulvio Conti, 2022-12-23 This book shows how Dante Alighieri has been represented in the Italian collective imagination from the late eighteenth century to the present day Often held to be a precursor of Italian unity the author of the Divine Comedy has been put forward both as a standard bearer of a secular anti clerical Italy and the embodiment of the concept of a deeply religious and Catholic nation while he was later adopted by nationalist and fascists as well as a pop icon in the age of the internet and globalization The book describes this long and fascinating history from a completely original point of view the centuries old myth of Dante is analysed from the perspective of cultural history The sources employed include Dante commemorations festivals and monuments pilgrimages to his tomb films and other media productions about Dante as well as comic strips advertisements and other cultural items dedicated to him *The Danteum* Thomas L. Schumacher, 1985 *Architecture and the Novel under the Italian Fascist Regime* Francesca Billiani, Laura Pennacchietti, 2019-09-14 *Architecture and the Novel under the Italian Fascist Regime* discusses the relationship between the novel and architecture during the Fascist period in Italy 1922 1943 By looking at two profoundly diverse aesthetic phenomena within the context of the creation of a Fascist State art Billiani and Pennacchietti argue that an effort of construction or reconstruction was the main driving force behind both projects the advocated revolution of the novel form realism and that of architecture rationalism The book is divided into seven chapters which in turn analyze the

interconnections between the novel and architecture in theory and in practice The first six chapters cover debates on State art on the novel and on architecture as well as their historical development and their unfolding in key journals of the period The last chapter offers a detailed analysis of some important novels and buildings which have in practice realized some of the key principles articulated in the theoretical disputes      **The Ten Most Influential Buildings in History** Simon

Unwin,2016-07-07 Even the most inventive and revolutionary architects of today owe debts to the past often to the distant past when architecture really was being invented for the first time Architects depend on their own imaginations for personal insights and originality but their ideas may be stimulated consciously or subliminally by particularly powerful buildings from history The Ten Most Influential Buildings in History Architecture s Archetypes identifies ten architectural archetypes that have been sources of inspiration for architects through the centuries Each archetype is analysed through distinctive examples following the methodology established by the author in his previous books The variety of lines of enquiry each archetype has provoked in latter day architects are then explored by analysing their work to reveal ideas inspired by those earlier buildings Archetypes have a timeless relevance In adopting this approach The Ten Most Influential Buildings in History is as pertinent to contemporary practice as it is to understanding buildings from antiquity and offers insights into the bridges of influence that can operate between the two      **Architecture's Pretexts** Aarati Kanekar,2014-11-13 The aim of

this book is to expose readers to architecture s pretexts that include literary narratives film theatre painting music and ritual as a bridge between diverse intellectual territories and architecture It introduces a selection of seminal modern and contemporary architectural projects their situation within the built environment and their intellectual and formal situation context as pretexts and design paradigms Connections between diverse bodies of information will be cultivated along with the ability to posit consequential relationships for the production of architecture Architecture s Pretexts seeks to cultivate a vision for architecture that sponsors operative links between the discipline of architecture and those outside of architecture Exploring the works of various architects including Guiseppe Terragni Peter Eisenman Peter Zumthor Perry Kulper and Smout Allen and Rem Koolhaas this book provides the framework to understanding architecture through the lens of art Key concepts discussed are allegories diagrams form material montage movement musical ratios narrative sequence and representation A valuable tool with over 75 black and white illustrations for students and professionals interested in interdisciplinary methods of design thinking      *Modern Architecture and the Sacred* Ross Anderson,Maximilian

Sternberg,2020-11-26 This edited volume *Modern Architecture and the Sacred* presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies

the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West **From Formalism to Weak**

**Form: The Architecture and Philosophy of Peter Eisenman** Stefano Corbo, 2016-04-15 Peter Eisenman is one of the most controversial protagonists of the architectural scene who is known as much for his theoretical essays as he is for his architecture While much has been written about his built works and his philosophies most books focus on one or the other aspect By structuring this volume around the concept of form Stefano Corbo links together Eisenman's architecture with his theory From Formalism to Weak Form The Architecture and Philosophy of Peter Eisenman argues that form is the sphere of mediation between our body our inner world and the exterior world and as such it enables connections to be made between philosophy and architecture From the start of his career on Eisenman has been deeply interested in the problem of form in architecture and has constantly challenged the classical concept of it For him form is not simply a cognitive tool that determines a physical structure which discriminates all that is active from what is passive what is inside from what is outside He has always tried to connect his own work with the cultural manifestations of the time firstly under the influence of Colin Rowe and his formalist studies secondly by re interpreting Chomsky's linguistic theories in the 80's by collaborating with Derrida and his de constructivist approach more recently by discovering Henri Bergson's idea of Time These different moments underline different phases different projects different programmatic manifestos and above all an evolving notion of form Taking a multi disciplinary approach based on the intersections between architecture and philosophy this book investigates all these definitions and in doing so provides new insights into and a deeper understanding of the complexity of Eisenman's work **The Production Sites of Architecture** Sophia Psarra, 2019-01-14 The Production Sites of Architecture

examines the intimate link between material sites and meaning It explores questions such as how do spatial configurations produce meaning What are alternative modes of knowledge production How do these change our understanding of architectural knowledge Featuring essays from an international range of scholars the book accepts that everything about the production of architecture has social significance It focuses on two areas firstly relationships of spatial configuration form order and classification secondly the interaction of architecture and these notions with other areas of knowledge such as literature inscriptions interpretations and theories of classification ordering and invention Moving beyond perspectives which divide architecture into either an aesthetic or practical art the authors show how buildings are informed by intersections between site and content space and idea thought and materiality architecture and imagination Presenting illustrated case

studies of works by architects and artists including Amale Andraos Dan Wood OMA Koen Deprez and John Soane The Production Sites of Architecture makes a major contribution to our understanding of architectural theory

**Foreign Cultural Policy in the Interbellum** Tamara Kessel, 2025-10-01 This book considers the growing awareness in the wake of World War I that culture could play an effective political role in international relations Tamara van Kessel shows how the British created the British Council in support of those cultural aims which took on particular urgency in light of the rise of fascist dictatorships in Europe Van Kessel focuses in particular on the activities of the British Council and the Italian Dante Alighieri Society in the Mediterranean area where their respective country's strategic and ideological interests most evidently clashed

*Ancient Rome and the Modern Italian State* Alessandro Sebastiani, 2023-07-20 Using Rome as a case study this book examines how architecture and urbanism can be used to construct national identity

*Italian Modernisms* Sergio Poretti, 2015-02-17T00:00:00+01:00 The studies in this book focus on Italian twentieth century architecture in particular design and construction techniques The descriptions of the worksites and building processes provide a much better and clearer picture of the different modernist styles that existed in Italy they also reveal the thin red line that characterised an univocal construction method mixed masonry enriched and not replaced by reinforced concrete a technique well suited to small artisanal worksites This was a mild version of modern construction in line with the role construction played in slowing down an industrialisation process which in Italy was in itself slow Each chapter illustrates a specific aspect of the history of construction and highlights several new issues involving architecture in general the important tectonic similarities which one way or another link the Littorio style and the several different kinds of rationalisms in the thirties the continuity between the autarchic experimentation and the techniques used in reconstruction the connection between the large scale works designed by engineers and the architectures of the fifties and sixties which now appear to be one of the mainstays of the unique Italian Style

*Twenty Buildings Every Architect Should Understand* Simon Unwin, 2010-02-25 Have you ever wondered how the ideas behind the world's greatest architectural designs came about What process does an architect go through to design buildings which become world renowned for their excellence This book reveals the secrets behind these buildings He asks you to read the building and understand its starting point by analyzing its final form Through the gradual revelations made by an understanding of the thinking behind the form you learn a unique methodology which can be used every time you look at any building
