Ichthyology in Context (1500-1880), 2023-12-28 Ichthyology in Context 1500 1880 provides a broad spectre of early modern manifestations of human fascination with fish fish understood in the early modern sense of the term as aquatilia all aquatic animals including sea mammals and crustaceans It addresses

the period's quickly growing knowledge about fish in its multiple varied and rapidly changing interaction with culture. This topic is approached from various disciplines: history of science, cultural history, history of collections, historical ecology, art history, literary studies, and lexicology. Attention is given to the problematic questions of visual and textual representation of fish and pre- and post-Linnean classification and taxonomy. This book also explores the transnational exchange of

ichthyological knowledge and items in and outside Europe. Contributors: Cristina Brito, Tobias Bulang, Jo o Paulo S. The Formation of Chinese Civilization Kwang-chih Chang, Pingfang Xu, Liancheng Lu, Xu Pingfang, Shao Wangping, Zhang Zhongpei, Wang Renxiang, 2005-01-01. Paleolithic sites from one million years ago, Neolithic sites with extraordinary jade and ceramic artifacts, excavated tombs and palaces of the Shang and Zhou dynasties: all these are part of the archaeological riches of China. This magnificent book surveys China's archaeological remains and in the process rewrites the early history of the world's most enduring civilization. Eminent scholars from China and America show how archaeological evidence establishes that Chinese culture did not spread from a single central area as was long assumed but emerged out of geographically diverse interacting Neolithic cultures. Taking us to the great archaeological finds of the past hundred years: tombs, temples, palaces, cities, they shed new light on many aspects of Chinese life. With a wealth of fascinating detail and hundreds of reproductions of archaeological discoveries, including very recent ones, this book is an invaluable resource for anyone interested in Chinese antiquity and Chinese views on the formation of their own civilization.

Phoenix Kingdoms Lai Guolong, Colin Mackenzie, Haicheng Wang, 2022-10-04. Featuring about 150 loans from China's Hubei Provincial Museum, this exhibition set to open at the Asian Art Museum of San Francisco under the name *Lost Kingdoms of Ancient China* examines the new finds of Zeng and Chu tombs together to explore the cultural landscape of the southern borderland of the Zhou dynasty. It also reveals the legendary rising story of the phoenix kingdom, erased by the Qin, highlighting the importance of the middle Yangtze River region in forming a southern style in Chinese art. For a better understanding of the Zeng and Chu material, the exhibition catalogue consists of seven essays to elaborate the introduction to the remarkable art and culture of this region, with entries of about 150 works in six categories: jade, bronze, ritual vessels, musical instruments, and weapons; lacquerware for luxury and ceremony; funerary bronze and wood objects and textiles and artefacts with designs. Seven contributors have written for this catalogue, including five outside scholars with expertise on different subjects.
