Spero, 2018-11-16 In the growing literature on middle powers this book contributes by expanding case study analysis and extending international relations theory in its application to foreign policy decisions Thus this book builds on prominent middle power literature and aims to advance our theoretical understanding for why crucial foreign policies were made by the pivotal middle powers this book examines Poland South Korea and Bolivia For this book s three case studies and their first term leadership s critical junctures from first term

post communist Poland post authoritarian post ruling party South Korea and post colonial Bolivia we have the antecedents for contemporary middle powers essential for realizing the regional evolution for cooperative change with greater powers systemically we may then grasp today why those historical foreign policies albeit not so long ago give us crucial antecedents for adapting and trying yet again to resolve seemingly perennial power dilemmas regionally peacefully Here are why middle power impact matters not only regionally for stronger dominant greater power neighbours but also for transformative middle power leaderships which proved pivotal geopolitically for their region s challenges and changes European Competition Law Annual 1998 Claus-Dieter Ehlermann,2000-09-14 Presenting academic papers and edited transcripts of panel discussions first presented at the Third Workshop on European Competition Law held in Florence in 1998 this volume provides insight into the debate of whether governments or the European Union should intervene to prevent powerful firms from abusing their control of critical gateways between consumers and communication information services The volume s three sections consisting of a panel discussion accompanied by from nine to 12 academic papers are organized into three themes regulating access to bottlenecks agreements integration and structural remedies and institutions and competence Panel participants include professors of economics law and telecommunications lawyers specializing in European trade and telecommunications law policy trade and technology advisors and consultants and others Distributed by ISBS c Book News Inc Skiing into Modernity Andrew Denning,2014-11-26 Skiing into Modernity is the story of how skiing moved from Europe s Scandinavian periphery to the mountains of central Europe where it came to define the modern Alps and set the standard for skiing across the world Denning offers a fresh sophisticated and engaging cultural and environmental history of skiing that alters our understanding of the sport and reveals how leisure practices evolve in unison with our changing relationship to nature Denning probes the modernist self definition of Alpine skiers and the sport s historical appeal for individuals who sought to escape city strictures while achieving mastery of mountain environments through technology and speed two central features distinguishing early twentieth century cultures Skiing into Modernity surpasses existing literature on the history of skiing to explore intersections between work tourism leisure development environmental destruction urbanism and more Medium Companies of Europe 1993/94 Whiteside,2012-12-06 Volumes 1 in addition three indexes are provided in Volumes 1 authoritative detail vital information on over 6500 of the largest and 3 on coloured paper at the back of the books and two companies in Western Europe indexes in the case of Volume 2 MAJOR COMPANIES OF EUROPE 1993 94 Volumes 1 The alphabetical index to companies throughout the 2 contain many of the largest companies in the world The Continental EC lists all companies having entries in Volume 1 area covered by these volumes the European Community in alphabetical order irrespective of their main country of represents a rich consumer market of over 320 million people operation Over one third of the world s imports and exports are channelled through the EC The Community represents the The alphabetical index in Volume 1 to companies within each world s largest integrated market **Snow Country** ,1992-11

Ski ,1990-09 **Sports Law in Switzerland** Lucien W. Valloni,Thilo Pachmann,2018-02-28 Derived from the renowned multi volume *International Encyclopaedia of Laws* this practical analysis of sports law in Switzerland deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports

have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policymakers access to sports law at this specific level Lawyers representing parties with interests in Switzerland will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law *Ski* ,1991-12 **Ski** ,1990-10 **Snow Country** ,1993-07 In the 87 issues of Snow Country published between 1988 and 1999 the reader can find the defining coverage of mountain resorts ski technique and equipment racing cross country touring and the growing sport of snowboarding during a period of radical change The award winning magazine of mountain sports and living tracks the environmental impact of ski area development and people moving to the mountains to work and live Competition Law and Regulation in European Telecommunications Pierre Larouche,2000-05-24 Using numerous practical examples this book examines the evolution of EC telecommunications law following the achievement of liberalisation the main policy goal of the 1990s After reviewing the development of regulation in the run up to liberalisation the author identifies the methods used to direct the liberalisation process and tests their validity in the post liberalisation context A critical analysis is made of the claim that competition law will offer sufficient means to regulate the sector in the future Particular emphasis is given to the way in which EC Competition Law changed in the 1990s using the essential facilities doctrine an expansive non discrimination principle and the policing of cross subsidisation to tackle what were then thought of as regulatory matters Also examined within the work is the procedural and institutional interplay between competition law and telecommunications regulation In conclusion Larouche explores the limits of competition law and puts forward a long term case for sector specific regulation with a precise mandate to ensure that the telecommunications sector as a whole fulfils its role as a foundation for economic and social activity
