

What a
distinguished
psychiatrist
says about

THE SKYJACKER

His Flights of Fantasy

"I really think the book is great, and in many different ways. . . . Dr. Hubbard, a psychiatrist, makes an exciting story of how the first two skyjackers that he interviewed present a special kind of personality dynamics, confirmed later in the first series of twenty cases. . . . His case histories are gems and each is an interesting narrative in itself. . . . Dr. Hubbard's empathetic way with patients shines out in these interviews.

"His explanation of the unconscious factors in the psychodynamics of family life and the psychoanalytic interpretation of dreams and other fantasy material is presented in a form that is easily understood and accepted.

"He also delves into the little understood sense of gravity, experienced through the vestibular system and which controls our sense of balance, of uprightness or flight into space. He shows how our sense of reality is derived from the sense of gravity and how neurotic and psychotic distortions develop from early infantile disturbances in this area, especially in those individuals who may become skyjackers. In this book, Dr. Hubbard has made psychiatric methods and insights meaningful and exciting for both the professional and lay reader."
