The Novel Tim Parks, 2015-07-16 The Literary Agenda is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities The category of the literary has always been contentious What is clear however is how increasingly it is dismissed or is unrecognised as a way of thinking or an arena for thought It is sceptically challenged from within for example by the sometimes rival claims of cultural history contextualized explanation or media studies It is shaken from without by even greater pressures by economic exigency and the severe social attitudes that can follow from it by technological change that may leave the traditional forms of serious human communication looking merely antiquated For just these reasons this is the right time for renewal to start reinvigorated work into the meaning and value of

literary reading The Novel A Survival Skill is the fruit of a lifetime s search for a different more immediate but again systematic and serious way of talking about literature Developed over many years it offers a completely new account of the relationship between a writer his or her work and the reader As such it radically undermines traditional literary criticism and the various criteria used for evaluating a work of fiction Drawing on ideas from systemic psychology Tim Parks suggest that both the content and style of a novelist s work the kind of stories told and the way in which they are told form part of a more general strategy or simply habit of communication that the novelist has learned within his or her family of origin The reader reacts to these in very much the same way he or she would react to the same communicative strategy in a real life encounter different readers reacting differently depending on their own backgrounds and habits of communication Looking at the different value structures that can dominate in any family good evil independence dependence success failure belonging exclusion this book looks at how a number of major writers position themselves within these value structures how this positioning is manifest in their writing and how readers have responded to this depending on their own positioning in the same semantics Thomas Hardy for example a man eager to believe himself courageous but terrified of the consequences of any socially unacceptable behaviour constructs stories which are courageous in their willingness to debate difficult issues but which constantly suggest that any attempt to behave courageously is condemned to disaster Hardy as it were imprisons himself in a world where it is folly to take risks He is thus exceedingly conservative in his life while at the same time able to think of himself as courageous in his writing The Novel A Survival Skill looks at the way different readers in different periods respond to this depending on their own position with regard to fear courage social convention and so on So Far Gone (The Jaxon Grey Chronicles, #1 & #1.5) - Hardcover J. Lukasik, 2011-07-11 In this path breaking study of the intersections between visual and literary culture Christopher J Lukasik explores how early Americans grappled with the relationship between appearance and social distinction in the decades between the American Revolution and the Civil War Through a wide range of evidence including canonical and obscure novels newspapers periodicals scientific and medical treatises and plays as well as conduct manuals portraits silhouettes and engravings *Discerning Characters* charts the transition from the eighteenth century's emphasis on performance and manners to the search for a more reliable form of corporeal legibility in the wake of the Revolution The emergence of physiognomy which sought to understand a person's character based on apparently unchanging facial features facilitated a larger shift in perception about the meanings of physical appearance and its relationship to social distinction The ensuing struggle between the face as a pliable medium of cultural performance and as rigid evidence of social standing Lukasik argues was at the center of the post Revolutionary novel which imagined physiognomic distinction as providing stability during a time of cultural division and political turmoil As Lukasik shows this tension between a model of character grounded in the fluid performances of the self and one grounded in the permanent features of the face would continue to shape not only the representation of social distinction within the novel but more broadly the practices of literary production and reception in nineteenth century America across a wide range of media The result is a new interdisciplinary interpretation of the rise of the novel in America that reconsiders the political and social aims of the genre during the fifty years following

the Revolution In so doing Discerning Characters powerfully rethinks how we have read and continue to read both novels and each other
