Recreation, 1952 **Death and Life of Australian Soccer** Joe Gorman, 2017-07-26 In *The Death and Life of Australian Soccer* journalist and historian Joe Gorman explores the rise and fall of Australia's first national football competition and shows how soccer came to practice and embody multiculturalism long before it became government policy. It examines the myths and legends of Australian sport and offers new ways of understanding the great changes that shaped the nation. This is more than a book about soccer; it is the riveting story of Australia's national identity. *Artificial Neural Networks - ICANN 2010* Konstantinos Diamantaras, Wlodek Duch, Lazaros S. Iliadis, 2010-08-12 This volume is part of the three-volume proceedings of the 20th International Conference on Artificial Neural Networks (ICANN 2010) that was held in Thessaloniki, Greece, during September 15-18, 2010. ICANN is an annual meeting sponsored by the European Neural Network Society (ENNS) in cooperation with the International Neural Network Society (INNS) and the Japanese Neural Network Society (JNNS). This series of conferences has been held annually since 1991 in Europe, covering the field of neurocomputing, learning systems, and other related areas. As in the past 19 events, ICANN 2010 provided a distinguished, lively, and interdisciplinary discussion forum for researchers and scientists from around the globe. It offered a good chance to discuss the latest advances of research and also all the developments and applications in the area of Artificial Neural Networks (ANNs). ANNs provide an information processing structure inspired by biological nervous systems, and they consist of a large number of highly interconnected processing elements (neurons). Each neuron is a simple processor with a limited computing capacity, typically restricted to a rule for combining input signals utilizing an activation function in order to calculate the output. One output signal may be sent to other units along connections known as weights that excite or inhibit the signal being communicated. ANNs have the ability to learn by example a large volume of cases through several iterations without requiring a priori knowledge of the relationships between process parameters. *The Global Art of Soccer* Richard Witzig, 2006
