Lopez, 2010-11-25 This series of volumes represents a comprehensive and integrated treatment of reproduction in vertebrates from fishes of all sorts through mammals It is designed to provide a readable coordinated description of reproductive basics in each group of vertebrates as well as an introduction to the latest trends in reproductive research and our understanding of reproductive events Whereas each chapter and each volume is intended to stand alone as a review of that topic or vertebrate group respectively the volumes are prepared so as to provide a thorough topical treatment across the vertebrates Terminology has been standardized across the volumes to reduce confusion where multiple names exist in the literature and a comprehensive glossary of these terms and their alternative names is provided A complete essential and up to date reference for research scientists working on vertebrate hormones and reproduction and on animals as models in human reproductive research Covers the endocrinology neuroendocrinology physiology behaviour and anatomy of vertebrate reproduction Structured coverage of the major themes for all five vertebrate groups allows a consistent treatment for all Special chapters elaborate on features specific to individual vertebrate groups and to comparative aspects similarities and differences between them

Sex and Gender Hierarchies Barbara D. Miller, 1993-02-18 This edited collection attempts to revive a unified anthropological approach to the study of sex and gender hierarchies Seventeen distinguished contributors from cultural anthropology physical anthropology archaeology and anthropological linguistics have produced a wealth of fascinating data on human and primate ancient and contemporary and primitive and developed

societies covering topics such as mothering and child care work health intrafamily relationships and public power The interdisciplinary approach successfully contributes to the development of better theory and methodology in anthropology

Women In Human Evolution Lori Hager,2005-08-18 This volume the first of it s kind examines the role of women paleontologists and archaeologists in a field traditionally dominated by men Women researchers in this field have questioned many of the assumptions and developmental scenarios advanced by male scientists As a result of such efforts women have forged a more central role in models of human development and have radically altered the way in which human evolution is perceived This history of the feminist critique of science is of profound significance and will be of interest to all those who work in the fields of anthropology archaeology paleontology and human biology The Cayo Santiago Macaques Richard G. Rawlins,Matt J. Kessler,1986-09-15 This volume presents a broad spectrum of research on the Cayo Santiago macaques a unique free ranging colony of rhesus macaques in Puerto Rico It includes thirteen scientific studies on the behavior and biology of the Cayo Santiago macaques as well as a detailed history of the colony and a complete bibliography of over 260 scientific publications based on work at Cayo Santiago from 1938 through 1984 The chapters represent examples of both short and long term research conducted on the island over the past several years Some are reviews providing a synopsis of complex longitudinal studies of behavior vocal communication functional morphology genetics and population dynamics Others document the results of opportunistic studies of behavior or biological surveys The chapters cover a broad range of topics but all share a common dependence on the detailed life history and genealogical data which make the Cayo Santiago macaque colony an important international research resource **Straight Science? Homosexuality, Evolution and**

Adaptation Jim McKnight,2003-09-02 A genetic basis for homosexuality has been all but proved yet Darwinism the most widely accepted evolutionary theory emphasises successful reproduction How do we explain a lifetime preference for non reproductive sex Whilst social constructionism offers explanations in terms of social learning and cultural preferences the body of evidence for a genetic predisposition to homosexuality grows Social learning argues that homosexual sex is merely misdirected and therefore futile but far from dying out it continues through the ages and is found in different cultures What if there was an evolutionary advantage to homosexuality Straight Science Homosexuality Evolution and Adaptation dares to ask such questions *Sex, Power, Conflict* David M. Buss,Neil Malamuth,1996-04-11 Sexual harassment in the workplace date

rape and domestic violence dominate the headlines and have recently sparked scholarly debates about the nature of the sexes Concurrently the scientific community is conducting research in topics of sex and gender issues Indeed more research is being done on the topics of sexual conflict and coercion than at any other time in the history of the social sciences Despite this attention it is clear that these issues are being addressed from two essentially different perspectives one is labeled feminist while the other viewed as antithetical to the feminist movement is called evolutionary psychology which emphasizes the history of reproductive strategies in understanding conflict between the sexes This book brings together leading experts

from both sides of the debate in order to discover how each could offer insights lacking in the other The editors overall goal is to show how the feminist and evolutionary approaches are complementary despite their evident differences then provide an integration and synthesis In fact several of the contributors to this unique volume consider themselves advocates of both approaches As a stimulating presentation of the dynamics of sex power and conflict and a pioneering rapprochement of the diverse tendencies within the scientific community this book will attract a wide audience in both psychology and women s studies fields

Macchiavellian Intelligence Dario Maestripieri,2008-09-15 Judged by population size and distribution homo sapiens are clearly the most successful primates A close second however would be rhesus macaques who have adapted to and thrived in such diverse environments as mountain forests dry grasslands and urban sprawl Scientists have spent countless hours studying these opportunistic monkeys but rhesus macaques have long been overshadowed in the public eye by the great apes who because of their greater intelligence are naturally assumed to have more to teach us both about other primates and about humans as well Dario Maestripieri thinks it is high time we shelve that misperception and with Macchiavellian Intelligence he gives rhesus macaques their rightful turn in the spotlight The product of more than twenty years studying these fascinating creatures Macchiavellian Intelligence caricatures a society that is as much human as monkey with hierarchies and power struggles that would impress Machiavelli himself High status macaques for instance maintain their rank through deft uses of violence and manipulation while altruism is almost unknown and relationships are perpetually subject to the cruel laws of the market Throughout this eye opening account Maestripieri weds his thorough knowledge of macaque behavior to his abiding fascination with human society and motivations The result is a book unlike any other one that draws on economics as much as evolutionary biology politics as much as primatology Rife with unexpected connections and peppered with fascinating anecdotes Macchiavellian Intelligence has as much to teach us about humans as it does about macaques presenting a wry rational and wholly surprising view of our humanity as seen through the monkey in the mirror

Sex Differences Linda Mealey,2000-04-13 Sex Differences serves as an advanced text for courses in evolutionary and human biology psychology and sexuality and gender studies It also serves as a reference source for academic professionals in these disciplines The book covers the evolution of sex and sex differences and sex differences and sexual strategies in non human and human animals The final chapter addresses issues of sex and gender in interpersonal relationships organizations and politics Diagrams graphs charts and tables illustrate key concepts cartoons and photos provide visual breaks and an element of humor Examines sexual differences from a multi level comparative approach Contains a thorough coverage of literature through 1998 and into 1999 Illustrates pages with a generous use of cartoons photos figures and diagrams Invites bonus learning with special interest boxes interspersed throughout text Presents a critical analysis Includes a combination of feminist and evolutionary thinking

How the Vertebrate Brain Regulates Behavior Donald Pfaff,2017-05-22 Throughout his career Donald Pfaff has demonstrated that by choosing problems and

methods with care biologists can study the molecular mechanisms of brains more complex than those of fruit flies snails and roundworms He offers a close up conversational perspective on a 50 year quest to understand how behavior is regulated in vertebrates

Manipulative Monkeys Susan Perry,2011-03-11 This book takes us into a Costa Rican forest teeming with simian drama where since 1990 primatologists Perry and Manson have followed four generations of capuchins The authors describe behavior as entertaining and occasionally as alarming as it is recognizable

Comparative Vertebrate Reproduction Julian Lombardi,1998-11-30 Comparative Vertebrate Reproduction is the only comprehensive textbook covering major topics in the reproductive biology of vertebrates from sexuality and gametogenesis to reproductive ecology and life history tactics The work draws heavily on recent reviews and papers while placing topics in a historical context and conceptual framework In addition the author provides detailed comparative surveys of each of the major topics discussed Comparative Vertebrate Reproduction has been written as a textbook for upper level undergraduate and graduate level students in biology zoology physiology animal science and veterinary medicine The work also serves as an excellent reference for researchers in medical and veterinary schools working in reproductive medicine

Human Reproductive Behaviour Laura Betzig,Monique Borgerhoff Mulder,Paul Turke,1988-03-31 *Parenting Across the Life Span* Jane Beckman Lancaster, Research on parenting through the life course has developed around two separate approaches Evolutionary biology provides fresh perspectives from life history theory using behavioral ecology and parental investment theory At the same time the social and behavioral sciences integrates research from long term studies of individual development and from the collection of life histories This path breaking book advances evolutionary life history research by integrating perspectives of these two approaches into a biosocial science of the life course It examines parenthood as a commitment extending throughout life and focuses on the impact on parental and child behavior of changes in the timing distribution and intensity of parental investment This perspective is particularly appropriate for research on parenting since the family is the universal human institution within which the bearing and rearing of children has been based and which transmits traditions beliefs and values to the young
