Social Being And Time:

Social Being and Time Christopher Gosden, 1994-01 The nature of time is one of the continuing mysteries of human life This is of particular relevance to archaeology with its unique focus on the social development of the human species from its origins to the present This book probes the way in which the rhythms of social life derive from our involvement in the world particularly as those rhythms unfold over many thousands of years The author argues that time is created through the social use of material things such as landscapes settlements and monuments and illustrates this with case studies drawn from Europe and the Pacific The aim of the book is to provide a theory of social change and social being as the basis for understanding social formations over long periods of time In developing this theory the author surveys ideas on human action and time as these have evolved over the last two centuries Although the theory is designed and presented to be of practical use in interpreting archaeological data exemplified here in case studies the broad scope of the book will make it of interest to all those concerned with the interactions between people and the material world

[Heidegger's Being and Time and Kierkegaard's The Sickness Unto Death as Hermeneutic to Paul's Epistles](#) Bong-Choul Hwang, 2025-01-16 Dive into a profound exploration of human existence through the philosophical and theological insights of Heidegger Kierkegaard and St Paul This book bridges the existential concepts of Dasein and soma with the spiritual dimensions of Paul's epistles revealing the interplay between individual authenticity interdependent coexistence and the inevitability of death By examining conscience guilt and temporality of time

this book offers a unique perspective on how we understand ourselves and relate to others The timeless questions posed by these thinkers can illuminate the path to finding meaning and projecting the possibility of future being beyond the confines of mortality This work is not just an academic study but an invitation to experience and interpret life through a richer

philosophical and theological lens **Space and Time in Mediterranean Prehistory** Stella Souvatzi, Athena

Hadji, 2013-10-15 Space and Time in Mediterranean Prehistory addresses these two concepts as interrelated rather than as separate categories and as a means for understanding past social relations at different scales The need for this volume was realised through four main observations the ever growing interest in space and spatiality across the social sciences the comparative theoretical and methodological neglect of time and temporality the lack in the existing literature of an explicit and balanced focus on both space and time and the large amount of new information coming from prehistoric Mediterranean It focuses on the active and interactive role of space and time in the production of any social environment drawing equally on contemporary theory and on case studies from Mediterranean prehistory Space and Time in Mediterranean Prehistory seeks to break down the space time continuum often assumed rather than inferred into space time units and to uncover the varying and variable interrelations of space and time in prehistoric societies across the Mediterranean The volume is a response to the dissatisfaction with traditional views of space and time in prehistory and revisits these concepts to develop a timely integrative conceptual and analytical framework for the study of space and time in archaeology *The Politics of Being*

Richard Wolin, 2016-11-15 Martin Heidegger's ties to Nazism have tarnished his stature as one of the towering figures of twentieth century philosophy The publication of the Black Notebooks in 2014 which revealed the full extent of Heidegger's anti-Semitism and enduring sympathy for National Socialism only inflamed the controversy Richard Wolin's *The Politics of Being* The Political Thought of Martin Heidegger has played a seminal role in the international debate over the consequences of Heidegger's Nazism In this edition the author provides a new preface addressing the effect of the Black Notebooks on our understanding of the relationship between politics and philosophy in Heidegger's work Building on his pathbreaking interpretation of the philosopher's political thought Wolin demonstrates that philosophy and politics cannot be disentangled in Heidegger's oeuvre Völkisch ideological themes suffuse even his most sublime philosophical treatises Therefore despite Heidegger's profundity as a thinker his critique of civilization is saturated with disturbing anti-democratic and anti-Semitic leitmotifs and claims **The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century**,

The Philosophy of the Western Jennifer L. McMahon, B. Steve Csaki, 2010-05-28 Essays about how stories of the Old West reflect and affect our beliefs and values The solitude of the lone rider the loyalty of his horse and the unspoken code of the West for many Western movies embody America and its values though the view of the country's history they present isn't always accurate In recent years scholars had declared the genre dead but a steady resurgence of western themes in literature film and television has reestablished its importance and influence In *The Philosophy of the Western* editors Jennifer

L McMahon and B Steve Csaki examine philosophical themes in the western genre Investigating subjects of nature ethics identity gender environmentalism and animal rights the essays in this volume draw from a wide range of westerns including the more recent popular and critical successes Unforgiven All the Pretty Horses 3 10 to Yuma and No Country for Old Men as well as literature and television serials such as Deadwood The Philosophy of the Western reveals the powerful role of the western in the American psyche *Social Being and Time* Christopher Gosden,1993 **Gadamer** Ingrid H.

Scheibler,2000-04-12 One of the first book length studies to examine Gadamer s relation to Heidegger in depth this important work looks at the ways in which Gadamer positively appropriates central elements of Heidegger s work as well as the way he extends Heidegger s critique of Western metaphysics avoiding and tacitly challenging some of the most problematical aspects of Heidegger s work By examining two of the central concepts in Gadamer s work tradition and language and by analyzing Gadamer s relation to his mentor Martin Heidegger Scheibler successfully shows that far from being the conservative both modernist and post modernist critics have accused him of being Gadamer anticipates a number of concerns central to post modern or post structuralist thought **Phenomenology of Space and Time** Anna-Teresa

Tymieniecka,2014-04-26 This book celebrates the investigative power of phenomenology to explore the phenomenological sense of space and time in conjunction with the phenomenology of intentionality the invisible the sacred and the mystical It examines the course of life through its onto-poietic genesis opening the cosmic sphere to logos The work also explores on the one hand the intellectual drive to locate our cosmic position in the universe and on the other the pull toward the infinite It intertwines science and its grounding principles with imagination in order to make sense of the infinite This work is the first of a two part work that contains papers presented at the 62nd International Congress of Phenomenology The Forces of the Cosmos and the Onto-poietic Genesis of Life held in Paris France August 2012 It features the work of scholars in such diverse disciplines as biology anthropology pedagogy and psychology who philosophically investigate the cosmic origins of beingness Coverage in this first part includes Toward a New Enlightenment Metaphysics as Philosophy of Life Transformation in Phenomenology Husserl and Tymieniecka Biologically Organized Quantum Vacuum and the Cosmic Origin of Cellular Life Plotinus Enneads and Self Creation The Creative Potential of Humor Transcendental Morphology A Phenomenological Interpretation of Human and Non Human Cosmos and Cognition and Emotion From Dichotomy to Ambiguity *The*

Aging and Time Henk Visser, Jan Baars, 2020-11-25 The aim of this volume is to revitalise the debate about the concepts of time implicit in the study of aging The many problems related to aging and the aged put an enormous pressure on the gerontological community to come up with practical applications and solutions In considering research findings we must keep in mind the basic assumptions that shape and influence even the most obvious statements about aging In this multidisciplinary volume the contributors take on the important task of exploring real issues concerning temporal concepts and approaches to aging and the concepts of time that are used in thinking about aging determine to a large extent the way aging is approached Most studies of aging still use a chronological approach to define populations for research purposes that is to determine which aged should be studied and to establish how people's characteristics social economic health and so forth change as a function of age This approach may lead to an accumulation of data but does not in itself lead to explanatory knowledge The step from

chronological time to chronological age should be taken cautiously if we want to consider aging processes seriously especially because chronological age is widely used in contemporary societies as a basis for regulating all kinds of processes with many consequences for individuals The arguments presented here do not deny the finitude of human life nor do they deny that aging can be observed in any individual if we compare the characteristics of that person over a relatively long period The question is how to approach these themes to get a better understanding To achieve this we need to understand the specific significance and relativity of chronological time and uncover unfounded deductions about time in relation to aging This book will be of interested to students and professors of the social sciences humanities and aging including the methodology of aging studies professionals working in the field of aging including sociologists psychologists and biologists
