ABOUT THE BOOK Stephen William Hawking is arguably the most famous scientist since Albert Einstein. He is a theoretical physicist, applied mathematician, and cosmologist, but he is best known to non-scientists as the author of *A Brief History of Time*, his best-selling book that unraveled the origins of the universe. His fame is so far-reaching that he has appeared on such popular entertainment as *Star Trek: The Next Generation* and *Late Night with Conan O'Brien*. He has even been animated as a character on *The Simpsons*. Hawking is also well-known for being the longest living survivor of amyotrophic lateral sclerosis (ALS), or Lou Gehrig's disease. Most patients can expect to live for no more than ten years following a diagnosis of ALS, but Hawking has survived for almost 50 years since the onset of the disease. The condition has caused him almost total paralysis, confining him to a wheelchair and forcing him to speak through a voice synthesizer activated by his cheek muscle.

MEET THE AUTHOR Ben Sztajnkrzyer was born in Montreal, Canada, and moved to Los Angeles to pursue filmmaking. He is a graduate of UCLA's prestigious screenwriting program, where he won numerous awards for his work. He has written several successful telefilms and has a feature horror screenplay in development with a prominent Hollywood producer. He also teaches screenwriting at Cal State Fullerton. In a past life, he worked as an editor of academic journals, so he can tell you everything you need to know about lower extremity wounds or human lactation. In his free time, Ben loves watching *Polar Express* and *Thomas the Tank Engine* over and over and over and over with his four-year-old son. When his son goes to bed, Ben stays up late and watches horror movies. His other interests include eating fatty foods and coming up with creative new excuses not to exercise.

EXCERPT FROM THE BOOK In addition to his scientific research, Hawking has been a fierce advocate of exposing general audiences to cutting-edge science. He rose to international prominence following the 1988 publication of *A Brief History of Time*. The book received glowing reviews and went on to sell over 10 million copies. It was also adapted into a documentary film of the same name by acclaimed filmmaker Errol Morris; the film summarized not only the important themes of the book but also provided a biography of Hawking's life. The documentary won the Grand Jury Prize at the Sundance Film Festival. Hawking followed up *A Brief History of Time* with several more books aimed at general audiences, including *The Universe in a Nutshell*, *A Briefer History of Time* (co-written by Leonard Mlodinow), and *The Grand Design* (also co-written by Mlodinow). He also edited *On the Shoulders of Giants*, a collection of works by such famous physicists and astronomers as Einstein, Newton, Kepler, Copernicus, and Galileo.

Stephen Hawking is no ordinary scientist. Perhaps more than any other scientist, he has broadened our basic understanding of the universe. His theoretical work on black holes and the origins and nature of the cosmos have been groundbreaking, if not downright revolutionary. He has also spent much of his adult life confined to a wheelchair, a victim of ALS. But his physical limitations have done nothing to confine him intellectually or hinder his scientific development. Hawking would already be

remarkable for his cutting edge work in theoretical physics alone However he has also managed to popularize science unlike any one else Today he is a household name and achieved almost cult like fame with the release of *A Brief History of Time* Although this book is steeped in the complexities of cosmology millions of people were eager to learn just some of what he had to offer Science writers White and Gribbin have painted a compelling portrait of a scientific mind that seemingly knows no bounds Weaving together clear explanations of Hawking s science with a detailed balanced and sensitive personal history we come to know and appreciate both sides of this incredible man Includes new updates in Hawking s biography and the recent discovery of the Higgs Boson or God particle *Stephen Hawking: A Secret Biography: A Rare, Concise Biography of a Visionary Physicist* Ronald Fraiser,2018-04-24 Get to know the real Stephen Hawking Behind the Public s Eyes Here s Just a Taste What You ll See in This Rare Stephen Hawking Biography Stephen Hawking Lesser Known Facts about Stephen Hawking 11 Hawking changed the end of time clock by 900 years after the end of 2016 claiming that this century would be the end of Planet Earth Therefore the need for searching alternative planets is a necessity for human beings now if they want the human race to exist for more than a 100 more years According to him the human race would need to occupy more than one planet to continue their existence Stephen Hawking Lesser Known Facts about Stephen Hawking 15 In the year 1985 after he had had his tracheotomy Stephen Hawking tried to kill himself by stopping his own breathing but it turned out that human body s reflex was stronger than his wish to end his own life Stephen Hawking stated in an interview that he would have finished his life by using assistance if he had come to the conclusion that he was a burden on the people he adored and if he had nothing left to contribute to the knowledge of mankind Stephen Hawking Lesser Known Facts about Stephen Hawking 9 Stephen held the belief that human lives can be prolonged or that humans can gain a state of eternal livelihood if they get to explore space for there may be an answer to human plight there and many more fascinating facts inside the book Get to know the Real Stephen Hawking Scroll Up and Download Now Price Increase to in 24 hours 100% Satisfaction Guaranteed Or Your Money Back **Stephen Hawking** Michael Woodford,2017-11-24 Stephen Hawking A Stephen Hawking Biography The Greatest Scientist of Our TimeDennis William Sciama 1926 1999 was a don at the University of Cambridge in the United Kingdom He was one of the most eminent physicists of his time In 1963 he was informed that he was to receive a new pupil a young man from Oxford who wished to undertake his doctoral thesis under his tutelage There was nothing unusual in this Mentoring new pupils was part and parcel of a university academic s life However the new pupil seemed on the face of it unremarkable In fact he had the reputation of a lazy and somewhat difficult student In his written exam at Oxford he had achieved neither a first nor a second degree A first would have entitled him to undertake postgraduate studies at Cambridge a second at Oxford He had to submit to an oral exam an ordeal that terrified him but nevertheless impressed his examiners who remarked that they faced intelligence greater than there on After a while Sciama also agreed that he was dealing with a highly potent intellect This man was only 21 years old and moreover had just been
