Stephen Smale: The Mathematician Who Broke the Dimension Barrier Steve Batterson, 2012-12-30 In 1957 Stephen Smale startled the mathematical world by showing that in a theoretical sense it is possible to turn a sphere inside out A few years later from the beaches of Rio he introduced the horseshoe map demonstrating that simple functions could have chaotic dynamics His next stunning mathematical accomplishment was to solve the higher dimensional Poincare conjecture thus demonstrating that higher dimensions are simpler than the more familiar three In 1966 in Moscow he was awarded the Fields Medal the most prestigious prize in mathematics Smale's vision and influence extended beyond mathematics into two vastly different realms In 1965 in Berkeley he initiated a program with Jerry Rubin of civil disobedience directed at ending the Vietnam War And as a mineral collector he accumulated a museum quality collection that ranks among the finest in the world Despite these diverse accomplishments Smale's name is virtually unknown outside mathematics and mineral collecting One of the objectives of this book is to bring his life and work to the attention of a larger community There are few good biographies of mathematicians This makes sense when considering that to place their lives in perspective requires some appreciation of their theorems Biographical writers are not usually trained in mathematics and mathematicians do not usually write biographies Though the author Steve Batterson is primarily a mathematician he has long been intrigued by the notion of working on a biography of Smale In this book Batterson records and makes known the life and accomplishments of this great mathematician and significant figure in intellectual history **Quantum**, 1999 The student magazine of math and science **Publications Update** World Bank, 1996 Catalogue American Mathematical Society, 2000 **Stephen Smale - Reaching Higher Dimensions** Steve Batterson, Kate Springer, 2024-07-17 In 2000 the American Mathematical Society published a biography of Professor Stephen Smale who had recently retired from a prestigious career at the University of California Berkeley But in retirement Professor Smale has continued his academic pursuits through the present day resulting in numerous additional publications and honors in the past 20 years As part of the CityU Legacy Series this book documents Professor Smale's time at City University of Hong Kong during his first appointment as a Distinguished University Professor in the Department of Mathematics from 1995-2001 as well as when he returned from 2009-2016 It also covers colorful and adventurous aspects of his life including his impressive mineral collection and intrepid sailing and hiking trips to exotic locales So that readers can experience the full extent of Professor Smale's notable life and work the previous biography about him is included to provide a complete picture of this renowned scholar of international influence A fascinating and inspiring story of how Steve Smale a bright yet seemingly unexceptional country boy became one of the most brilliant and influential mathematicians on the planet Lenore Blum Distinguished Career Professor of Computer Science Emerita Carnegie Mellon University I first met Steve during a visit to Berkeley I did not foresee that the visit would mark the beginning of a long lasting relationship including but going well beyond

mathematical collaboration Felipe Cucker Emeritus Professor Department of Mathematics City University of Hong Kong
