Utopian Reality Christina Lodder, Maria Kokkori, Maria Mileeva, 2013-10-24 This collection of essays deals broadly with the visual and cultural manifestation of utopian aspirations in Russia of the 1920s and 1930s while examining the before and after life of such ideas both geographically and chronologically The studies document the pluralism of Russian and Soviet culture at this time as well as illuminating various cultural strategies adopted by officialdom The result serves to complicate the excessively simplistic narrative that avant garde dreams were suddenly and brutally crushed by Soviet repression and to contest the notion of the avant garde s complicity in Stalinism Naturally some essays document episodes in the defeat and dismantling of utopian projects but others trace the persistence of avant garde ideas and the astonishing tenacity of creative

individuals who managed to retain their personal integrity while continuing to serve the cause of Soviet power Contributors include John E Bowlt Natalia Budanova David Crowley Evgeny Dobrenko Maria Kokkori Christina Lodder Muireann Maguire Nicholas Bueno de Mesquita Maria Mileeva John Milner Nicoletta Misler Maria Starkova Vindman Brandon Taylor and Maria Tsantsanoglou

Towards Universality Richard Padovan,2013-07-04 There is no shortage of books about Le Corbusier or Mies van der Rohe or De Stijl However this book considers them in relation to each other observing how a study of one can illuminate the works of the others Going beyond a superficial look at the end products of these architects this book examines the philosophical foundations of their work taking as its central theme the aim of universality as opposed to the individual and the particular Each of these three aimed at universality but for each this concept took on a different form The universality of De Stijl and artists like Van Doesburg and Mondrian resembled that of the universe itself it was boundless going beyond the limits of the canvas and seeking to abolish the wall as the boundary between interior and exterior space In contrast each of Le Corbusier s creations was a self contained universe within a clear frame while Mies fluctuated between these two perspectives

Mathematics and Art Lynn Gamwell,2016

This is a cultural history of mathematics and art from antiquity to the present. Mathematicians and artists have long been on a quest to understand the physical world they see before them and the abstract objects they know by thought alone. Taking readers on a tour of the practice of mathematics and the philosophical ideas that drive the discipline, Lynn Gamwell points out the important ways mathematical concepts have been expressed by artists. Sumptuous illustrations of artworks and cogent math diagrams are featured in Gamwell's comprehensive exploration. Gamwell begins by describing mathematics from antiquity to the Enlightenment, including Greek, Islamic, and Asian mathematics. Then focusing on modern culture, Gamwell traces mathematicians' search for the foundations of their science, such as David Hilbert's conception of mathematics as an arrangement of meaning-free signs, as well as artists' search for the essence of their craft, such as Aleksandr Rodchenko's monochrome paintings. She shows that self-reflection is inherent to the practice of both modern mathematics and art, and that this introspection points to a deep resonance between the two fields. Kurt Gödel posed questions about the nature of mathematics in the language of mathematics, and Jasper Johns asked, "What is art in the vocabulary of art?" Throughout, Gamwell describes the personalities and cultural environments of a multitude of mathematicians and artists, from Gottlob Frege and Benoît Mandelbrot to Max Bill and Xu Bing. *Mathematics and Art* demonstrates how mathematical ideas are embodied in the visual arts and will enlighten all who are interested in the complex intellectual pursuits, personalities, and cultural settings that connect these vast disciplines.

[Hermeneutics and Medieval Culture](#) Patrick J. Gallacher, Helen Damico, 1989-06-26. This study explores the art of interpretation in works of history, art, music, and literature from the medieval period. The authors demonstrate that the search for meaning was a primary concern of medieval authors and that the history of medieval thought, from Augustine to Aquinas and Ockham, illustrates the dialectic of question and answer that is the foundation of hermeneutics. This study is the first to offer a diversity of hermeneutic approaches and themes in the context of medieval works. The study's interdisciplinary approach to the medieval works considered invites analysis from scholars and critics in all areas of medieval studies. The breadth of scope in addressing the art of interpretation in the various disciplines also provides a valuable general introduction to medieval culture.

three centuries of development In this synthetic overview Harry Mallgrave examines architectural discourse within its social and political context He explores the philosophical and conceptual evolution of its ideas discusses the relation of theory to the practice of building and most importantly considers the words of the architects themselves as they contentiously shaped Western architecture He also examines the compelling currents of French rationalist and British empiricist thought radical reformation of the theory during the Enlightenment the intellectual ambitions and historicist debates of the nineteenth century and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s Modern Architectural Theory challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism
