Trends in Soviet Theoretical Linguistics F. Kiefer, 2012-12-06

Theoretical linguistics is a term not very often used in Soviet Linguistics. The terms structural linguistics, mathematical linguistics, applied linguistics, which incidentally has another meaning here than in other parts of the world, all may cover theoretical work in linguistics. In older days serious theoretical work was done under the heading machine translation. Very often the need for a special term for theoretically oriented studies in linguistics does not even arise. Does this mean that there is no real theoretical linguistics in the Soviet Union? This would be of course a completely false conclusion. Some linguists tend to identify theoretical linguistics with generative grammar. Though it might be true and I am myself very much inclined to subscribe to this view that generative grammar has been the most fruitful linguistic theory up to now, this does not justify however the above identification. Incidentally, as we shall see later, generative grammar has not been left unnoticed in the Soviet Union either. There are different trends within theoretical linguistics, one of which is generative grammar. While generative grammar, though one can worry about the content of this notion for many internal and external reasons, seems to be the main theoretical trend in the United States and in Western Europe, it represents only one of the main trends in Soviet linguistics.

International Encyclopedia of Linguistics William Frawley, 2003-05

The International Encyclopedia of Linguistics, 2nd Edition, encompasses the full range of the contemporary field of linguistics, including historical, comparative, formal, mathematical, functional, and philosophical linguistics, with special attention given to interrelations within branches of linguistics and to relations of linguistics with other disciplines. Areas of intersection with the social and behavioral sciences, ethnolinguistics, sociolinguistics, psycholinguistics, and behavioral linguistics receive major coverage, along with interdisciplinary work in language and literature, mathematical linguistics, computational linguistics, and applied linguistics. Longer entries in the International Encyclopedia of Linguistics, ranging up to four thousand words, survey the major fields of study, for example, anthropological linguistics, history of linguistics, semantics, and phonetics. Shorter entries treat specific topics within these fields, such as code switching, sound symbolism, and syntactic features. Other short entries define and discuss technical terms used within the various subfields or provide sketches of the careers of important scholars in the history of linguistics, such as Leonard Bloomfield, Roman Jakobson, and Edward Sapir. A major portion of the work is its extensive coverage of languages and language families. From those as familiar as English, Japanese, and the Romance languages to Hittite, Yoruba, and Nahuatl, all corners of the world receive treatment. Languages that are the subject of independent entries are analyzed in terms of their phonology, grammatical features, syntax, and writing systems. Lists attached to each article on a language group or family enumerate all languages extinct or still spoken within that group and provide detailed information on the number of known speakers, geographical range, and degree of intelligibility with other languages in the group. In this way, virtually every known language receives coverage. For ease of

reference and to aid research the articles are alphabetically arranged each signed by the contributor supported by up to date bibliographies line drawings maps tables and diagrams and readily accessible via a system of cross references and a detailed index and synoptic outline Authoritative comprehensive and innovative the 2nd edition of the International Encyclopedia of Linguistics will be an indispensable addition to personal public academic and research libraries and will introduce a new generation of readers to the complexities and concerns of this field of study Indian Linguistics : Journal of the Linguistic Society of India ,2010

Colonialism, Orientalism and the Dravidian Languages K. Venkateswarlu,2020-11-29 The Dravidian language family is marked historically by a protracted struggle between Tamil and its aggressively assertive supremacy and the consequent peripheralizing of other majoritarian languages of the region This book looks at the development of Telugu with its unique grammatical and lexical tradition as instrumental in the construction of the concept of the Dravidian language family in 1816 and in the development of comparative linguistics since that time The author s arguments locate Telugu in multiple matrices of historical and theoretical Orientalism the colonial state s interest in native languages the politics of state patronage questions of cultural assimilation and divergence the overbearing presence of Tamil and its literary traditions and the related inter and intra civilizational dialogues The book thus grapples with the tortured emergence of Telugu a product of the dynamics of Andhra society economy polity and culture influenced and driven by Muslim Hindu and Western influence With its richly textured narrative this book will be of interest to those in the fields of history sociology socio linguistics colonial studies and literature apart from the generally interested reader Studies in the Historical Phonology of Asian Languages William G. Boltz,Michael C. Shapiro,1991-01-01 This volume owes its genesis to a series of lectures on various aspects of the historical phonology of Asian languages sponsored by the Asian Linguistics Colloquium of the Department of Asian Languages and Literature of the University of Washington in Seattle The volume includes papers on both theoretical and applied aspects of Asian linguistics and topics examined include vowel harmony dialect variation and inherent variability historical reconstruction based on written records historical reconstruction based on the comparative method accentology and language standardization While some of the papers are comparative in nature others deal with effects of language contact on phonological systems Languages and language families dealt with are Indo Aryan Dravidian Altaic Chinese Uralic Korean and Tai Dissertation Abstracts ,1957-05 Abstracts of dissertations and monographs in microform
