*Upon Entropy* Riccardo M. Villa, 2023-12-18 In his 1979 essay *The Postmodern Condition* A Report on Knowledge philosopher Jean-François Lyotard noted that the advent of the computer opened up a stage of progress in which knowledge has become a commodity

Modernity and postmodernity appear as two stages of a process resulting from the conflict of science and narrative. As science attempts to distance itself from narrative it must create its own legitimacy. This paper takes up this challenge with a focus on the question of imagery. The image is precisely what modern science seeks to free itself from in its quest for absolute transparency. This transparency is examined from the perspective of architecture drawing on arguments from philosophy, quantum mechanics, theology, and information theory. Natural science in the context of postmodernism. Quantum mechanics and information theory. New volume in the Applied Virtuality Book Series.

**Restoring the Soul of the World** David Fideler, 2014-11-20. Humanity's creative role within the living pattern of nature. Explores important scientific discoveries that reveal the self-organizing intelligence at the heart of nature. Examines the idea of a living cosmos from its roots in the earliest cultures to its eclipse during the Scientific Revolution to its return today. Reveals ways to reengage our creative partnership with nature and collaborate with nature's intelligence. For millennia the world was seen as a creative interconnected web of life constantly growing, developing, and restoring itself. But with the arrival of the Scientific Revolution in the 16th and 17th centuries the world was viewed as a lifeless clock-like mechanism bound by the laws of classical physics. Intelligence was a trait ascribed solely to human beings and thus humanity was viewed as superior to and separate from nature. Today new scientific discoveries are reviving the ancient philosophy of a living interconnected cosmos and humanity is learning from and collaborating with nature's intelligence in new life-enhancing ways from ecological design to biomimicry. Drawing upon the most important scientific discoveries of recent times, David Fideler explores the self-organizing intelligence at the heart of nature and humanity's place in the cosmic pattern. He examines the ancient vision of the living cosmos from its roots in the world-soul of the Greeks and the alchemical tradition to its eclipse during the Scientific Revolution to its return today. He explains how the mechanistic worldview led to humanity's profound sense of alienation for if the universe only functioned as a machine there was no longer any room for genuine creativity or spontaneity. He shows how this isn't the case and how even at the molecular level natural systems engage in self-organization, self-preservation, and creative problem-solving, mirroring the ancient idea of a creative intelligence that exists deep within the heart of nature. Revealing new connections between science, religion, and culture, Fideler explores how to reengage our creative partnership with nature and new ways to collaborate with nature's intelligence.

Unveiling Sophia Anne Elizabeth Taylor,2021-05-01 Eternal feminine wisdom synchronizes the human heartbeat with the heartbeat of the universe The Dalai Lama famously proclaimed that Western Women can save the world But many modern women and men are painfully dissociated from Sophia their inner spring of feminine wisdom and the primal source of their power and nurturance Western women from around the globe have deep archetypal roots that have lain dormant after millennia of patriarchal control Sophia awaits collective rebirth and her portal for rebirth is through the heart Sophia who the ancient Greeks regarded as the goddess of wisdom represents a threshold through which we can access the deep reserves of archetypal wisdom veiled within our hearts The eternal feminine hithers us on Johann Wolfgang von Goethe Faust II To reveal this wisdom we must open ourselves to methods beyond logos the masculine principle of logic and structure that

underlies the scientific approaches characteristic of our enlightened age Paradoxically as we begin to lift Sophia s veil we encounter scientific profundity proving that masculine and feminine are not fundamentally at odds Sophia does not replace logos but instead offers a balancing perspective a wisdom beyond sense perceptions Through Sophia the wisdom of the heart accelerates the evolution of humanity from one sided logos to incorporate new forms of awareness and through our collective evolution we also heal the soul of the world anima mundi
