Deryck Sheriffs,2004-09-07 Does the religious experience of Israelites mean anything to us today Or does it apply more to the rituals prayers and myths of the ancient Near East than to our world Was Israelite spirituality so rooted in its culture that it will not transplant Or can we graft its shoots of faith and its struggle with life into our contemporary spirituality with integrity What happens when we look at a relationship with God through the lens of the Old Testament Does the Old Testament open a window on what it means to be human now These are the issues addressed in this survey It looks at what it means to see life as a journey walked with God It explores the fear of the Lord biblical meditation and confronting God in anger It focuses on life s mundaneness and its absurdity It analyses guilt true and false and restoration through forgiveness It asks whether Israel s experience of time passing the calender of seasons and the rhythm of life offer today s urban commuters memos for their diaries Deryck Sheriff s concern to bridge the divide has led him to write a book on the Old Testament which moves from the world of academic biblical studies into the realm of contemporary spirituality

Shades of Loneliness Richard Stivers, 2004-02-09 To varying degrees loneliness has us all in its grip In this incisive and controversial book Richard Stivers rejects the recent emphasis on genetic explanations of psychological problems arguing that the very organization of technological societies is behind the pervasive experience of loneliness The extreme rationality that governs our institutions and organizations results in abstract and impersonal relationships in much of daily life Moreover as common meaning is gradually eroded our connections to others become vague and tenuous Our ensuing fear and loneliness however can be masked by an outgoing extroverted personality In its extreme form loneliness assumes pathological dimensions in neurosis and schizophrenia Stivers maintains that even here the causes remain social The various forms of neuroses and psychoses follow the key contradictions of a technological society For instance narcissism and depression reflect the tension between power and meaninglessness that characterizes modern societies Stivers demonstrates that there is a continuum from the normal technological personality through the various neuroses to full blown schizophrenia He argues that all forms of loneliness emanate from the same cause they likewise share a common dynamic despite their differences Loneliness in its many manifestations seems to be the price we must pay for living in the modern world Yet nurturing family friend and community ties can mitigate its culturally and psychologically disorganizing power This book is a clarion call for a renewal of moral awareness and custom to combat the fragmentation and depersonalization of our technological civilization
