Hooper,W. Grant Willis,2013-11-11 The publication of this very important volume comes at a timely juncture in the history of learning disabilities The focus of this volume is on developing a multidisciplinary understanding of the complexities of the research on learning disabilities and its various sUbtypes It also will serve as an important compendium of the subtyping literature particularly with respect to pertinent issues of nosology specific sUbtotyping models neuro psychological diagnosis and treatment As the authors so correctly suggest the differential diagnosis of learning disabilities subtypes is a critical first step in developing theoretically sound programs of psychoeducational intervention Clearly one must have some idea about the general abilities of a child before realistic expectations can be charted Also how can one plan a program of intervention without some knowledge of the deficient components of achievement within a do main Does it not make both conceptual and practical sense to identify an individual s relative strengths and weaknesses so that abilities or strengths can be utilized to optimize functioning in areas of deficit Although these all sound like reasonable precursors to assisting individuals in need of academic assistance there are those who would argue otherwise Impor tantly however the

Director of the National Institutes of Health in a recent report to Congress advocates exactly what this volume proposes. Indeed, there are important needs to be addressed and the literature reviewed herein strongly supports the conclusions drawn by these authors. The neuropsychological basis of psychiatric disorders in children are then examined together with epilepsy and closed head injury, as well as different approaches and issues relevant to neuropsychological evaluation of children. Subsequent chapters deal with the importance of soft signs and neuropsychological screening, neuropsychological assessment of children, actuarial and clinical assessment practices, and intervention and treatment. The book also presents an overview of how one might conceptualize and integrate differential diagnosis of neurodevelopmental learning disabilities with appropriate curriculum-based intervention strategies. The final chapter considers the broader applications of behavioral neuropsychology.
