Teachers possess a wealth of untapped wisdom and valuable experience Be it educational policy curriculum development or textbook selection rare are the instances when teachers views are solicited Traditionally teacher development has been driven by administrators of schools and it often takes the form of a mentor teaching the staff of a school But what happens when teachers across different locations collaborate and learn together This volume documents such an initiative sparked off by the Covid 19 pandemic which brought people together online It showcases the power of teachers debating discussing and learning from each other Based on an Indian experience this book addresses a range of issues that teachers and educators across the world face encompassing pedagogy classroom management school culture and teacher development A unique story of community building and teacher education this book also contains key outcomes and insights while taking us through their action research projects It showcases a model of teacher development that can be adopted by interested readers anywhere in the world Above all it brings out the crying need for a teacher s voice to be heard for far too long teachers have been mere implementers of decisions taken by policymakers or managements of schools By means of networking communities such as the one described in this book the transformation of teachers going from whispers to resonance is

greatly amplified An important intervention in the domain of teacher development this volume will be of great interest to students researchers educators teacher educators and sociologists of education It will also be useful for teacher trainees academicians policymakers schoolteachers curriculum developers teacher training institutes and universities offering teacher education programmes The Role of Subject Knowledge in the Early Years of Schooling Carol Aubrey,1994
