The Tenacious Mars Effect Suitbert Ertel, Kenneth Irving, 1996 Skepticism and Humanism Paul Kurtz, 2023-05-31 As we begin the third millennium there is cause for cautious optimism regarding the human prospect Democratic revolutions and the doctrine of universal human rights have captured the imagination of large sectors of humanity while major advances in science and technology continue to conquer disease and extend life contributing to rising standards of living affluence and cultural freedom on a worldwide basis Paradoxically at the same time ancient authoritarian fundamentalist religions have grown in vitriolic intensity along with bizarre New Age media driven paranormal belief systems Also surprising is the resurgence of primitive tribal and ethnic loyalties unleashing wars of intolerance and bitterness In *Skepticism and Humanism* Paul Kurtz locates these threatening developments within a long standing and largely unchallenged theological worldview He proposes as an alternative to religion a new cultural paradigm rooted in scientific naturalism rationalism and a humanistic outlook An estimated 60 percent of scientists are atheists or agnostics However the skeptical world view has been given little currency even in advanced societies because of a cultural prohibition against the criticism of religion At the same time science has become increasingly narrow and specialized so that few people can draw on its broader intellectual and cultural implications *Skepticism and Humanism* attempts to meet this need It defends skepticism as a method for developing reliable knowledge by using scientific inquiry and reason to test all claims to truth It also defends scientific naturalism an evolutionary view of nature life and the human species Kurtz sees the dominant religious doctrines as drawn from an agricultural nomadic past and emphasizes the need for a new outlook applicable to the postindustrial information age At the same time he rejects postmodernism for abandoning science and embracing a form of nihilism There can be no doubt that as a new global civilization emerges scientific naturalism rationalism and secular humanism have something significant to say about the meaning of life *Skepticism and Humanism* shows how they can to foster democratic values and social prosperity The book will be important for philosophers scientists and all those concerned with contemporary issues **Head and Heart** Victor Mansfield, 2002-07-01 This unusual book tells the story of an astrophysicist's search for meaning from psychological philosophical and spiritual points of view Mansfield weaves personal memoir with clear scientific discussion and quotes such famous thinkers and writers as Steven Weinberg Jane Goodall Joseph Campbell C G Jung Nelson Mandela Robert Frost and the Sufi poet Rumi In plain language Mansfield explores radio astronomy the nature of time relativity cosmological expansion and quantum mechanics with personal examples of meditation dreams and synchronicity to show that spiritual experience offers a fundamentally different window into reality than that given by science And he tackles these questions What is invisible matter Am I merely a complex tangle of atoms and molecules controlled by the laws of physics What is the nature of soul How is modern science a form of religion You will be charmed by Mansfield's anecdotes to dramatize his own struggles with such questions In a culture where the relationship between science and spirituality

continues to be strained he offers hope for a higher synthesis that embraces dissenting worldviews and encourages compassionate action in the world

Cosmic Influences on Humans, Animals, and Plants John T. Burns, 1997 This annotated bibliography makes available to the general reader and scholar a broad survey of the scientific literature on alleged cosmic influences on humans animals and plants To be included a study must involve the collection of data or be a commentary on studies based on data As some of the topics covered are still quite controversial in nature while other topics have been scientifically studied to some extent the terms alleged claimed or suggested are noted in the citations to remind the reader that a particular study has not necessarily been proven to be scientifically valid The four parts of Cosmic Influences on Humans Animals and Plants are organized around alleged effects of solar activity the moon the planets and possible mechanisms for such actions Some effects that the sun and moon are known to have on our daily lives such as the cycles of light and dark and the lunar tides have not been included because of their commonality However other effects such as those influences the moon has been shown to have over some animals have been included for the sake of completeness With subject and author indexes

The Synchronicity Key David Wilcock, 2014-07-29 Unlock the key to a universal life force in this astonishing book from the New York Times bestselling author of The Source Field Investigations and Awakening in the Dream The Source Field Investigations was a New York Times Wall Street Journal and USA Today bestseller that uncovered hidden science and lost prophecies to illuminate an entirely new understanding of our world today Now in The Synchronicity Key David Wilcock embarks on an astonishing investigation into what lies beyond finding proof that everything in our lives is not only connected but it also influences everything else Using history astrology and synchronicity theory among other concepts Wilcock shows that there is hidden architecture within time guiding individuals and nations through a system of enlightenment Joseph Campbell called the Hero's Journey Historical events occur in shockingly precise repeating cycles of time as a result Once we understand and identify the hidden laws of this seemingly random synchronicity we are left with a remarkable blueprint of how best to lead our lives in this uncertain and confusing world

The Gold Leaf Lady and Other Parapsychological Investigations Stephen E. Braude, 2008-11-15 For over thirty years Stephen Braude has studied the paranormal in everyday life from extrasensory perception and psychokinesis to mediumship and materialization The Gold Leaf Lady and Other Parapsychological Investigations is a highly readable and often amusing account of his most memorable encounters with such phenomena Here Braude recounts in fascinating detail five particular cases some that challenge our most fundamental scientific beliefs and others that expose our own credulousness Braude begins with a south Florida woman who can make thin gold colored foil appear spontaneously on her skin He then travels to New York and California to test psychokinetic superstars and frauds like Joe Nuzum who claim to move objects using only their minds Along the way Braude also investigates the startling allegations of K R a policeman in

Annapolis who believes he can transfer images from photographs onto other objects including his own body and Ted Serios a deceased Chicago elevator operator who could make a variety of different images appear on Polaroid film Ultimately Braude considers his wife's surprisingly fruitful experiments with astrology which she has used to guide professional soccer teams to the top of their leagues as well as his own personal experiences with synchronicity a phenomenon he argues that may need to be explained in terms of a refined extensive and dramatic form of psychokinesis Heady provocative and brimming with eye opening details and suggestions *The Gold Leaf Lady and Other Parapsychological Investigations* will intrigue both adherents and detractors of its controversial subject matter alike
