The Lost Art of Listening, Second Edition Michael P. Nichols, 2009-02-16

One person talks, the other listens. It's so basic that we take it for granted. Unfortunately, most of us think of ourselves as better listeners than we actually are. Why do we so often fail to connect when speaking with family members, romantic partners, colleagues, or friends? How do emotional reactions get in the way of real communication? This thoughtful, witty, and empathic book has already helped over 125,000 readers break through conflicts and transform their personal and professional relationships. Experienced therapist Mike Nichols provides vivid examples, easy-to-learn techniques, and practical exercises for becoming a better listener and making yourself heard and understood, even in difficult situations.

Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2011-01-29

Shortlisted for the 2012 Prix Vogel in Economic Law. Public procurement and competition law are both important fields of EU law and policy, intimately intertwined in the creation of the internal market. Hitherto, their close connection has been noted but not closely examined. This new work is the most comprehensive attempt to date to explain the many ways in which these fields, often considered independent of one another, interact and overlap in the creation of the internal market. In this process of convergence between competition and public procurement law, the need for this joint study is clearly apparent. As such, the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is

particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement

Floodgates of Anarchy Stuart Christie,Albert Meltzer,2010-06-07 The floodgates holding back anarchy are constantly under strain The liberal would ease the pressure by diverting some of the water the conservative would shore up the dykes the totalitarian would construct a stronger dam But is anarchy a destructive force The absence of government may alarm the authoritarian but is a liberated people really its own worst enemy or is the true enemy of mankind as the anarchists claim the means by which he is governed Without government the world could manage to end exploitation and war Anarchy should not be confused with weak divided or manifold government As Christie and Meltzer point out only with the total abolition of government can society develop in freedom
