The ^AOxford Handbook of Tense and Aspect Robert I. Binnick, 2011-07-01 This Handbook is a comprehensive authoritative and accessible guide to the topics and theories that currently form the front line of research into tense aspect and related areas

Tense, Aspect, and Action Carl Bache, Hans Basbøll, Carl-Erik Lindberg, 1994 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics

The Evolution of Grammar Joan Bybee, Revere Perkins, William Pagliuca, 1994-11-15 Joan Bybee and her colleagues present a new theory of the evolution of grammar that links structure and meaning in a way that directly challenges most contemporary versions of generative grammar This study focuses on the use and meaning of grammatical markers of tense aspect and modality and identifies a universal set of grammatical categories The authors demonstrate that the semantic content of these categories evolves gradually and that this process of evolution is strikingly similar across unrelated languages Through a survey of seventy six languages in twenty five different phyla the authors show that the same paths of change occur universally and that movement along these paths is in one direction only This analysis reveals that lexical substance evolves into grammatical substance through various mechanisms of change such as metaphorical extension and the conventionalization of implicature Grammaticization is always accompanied by an increase in frequency of the grammatical marker providing clear evidence that language use is a major factor in the evolution of synchronic language states The Evolution of Grammar has important implications for the development of language and for the study of cognitive processes in general

The Prominence of Tense, Aspect and Mood D.N.S. Bhat, 1999-03-15 The book puts forth an exciting hypothesis for the typologist Its major claim is that languages can generally be regarded as belonging to a tense prominent aspect prominent or mood prominent language type This grouping can be based upon the relative prominence that languages attach to one or the other of the three verbal categories namely tense aspect and mood by grammaticalizing the chosen category to a greater degree than others and by making it more obligatory more systematic and more pervasive than others The grouping however involves a gradation as is indeed the case with other typological groupings with some languages manifesting the relevant characteristic more strikingly than others There are several characteristics that can be correlated with the relative prominence that languages attach to verbal categories For example tense prominent languages tend to have mostly active but not stative verbs They also tend to keep adjectives as a distinct category or group them with nouns but not with verbs Verbal forms used for foregrounding generally belong to the most prominent verbal category These and other similar correlations make this typological classification worth pursuing The book also contains a descriptive study of the three verbal categories

confronted with the question of how to express this internal constituency of one situation in their mother tongue Various devices that are used by German learners of

Tense-aspect Paul J. Hopper, 1982-01-01 The verbal categories of tense and aspect have been studied traditionally from the point of view of their reference to the timing and time perspective of the speaker's reported experience They are universal categories both in terms of the semantic functional domain they cover as well as in terms of their syntactic and morphological realization Nevertheless their treatment in contemporary linguistics is often restricted and narrow based often involving mere recapitulation of traditional semantic and morphotactic studies The present volume arises out of a symposium held at UCLA in May 1979 in which a group of linguists gathered to re-open the subject of tense and aspect from a variety of perspectives including in addition to the traditional semantics also discourse pragmatics psycholinguistics child language Creolization and diachronic change The languages discussed in this volume include Russian Turkish English Indonesian Ameslan Eskimo various Creoles Mandari Hebrew Bantu and others The emphasis throughout is not only on the description of language specific tense aspect phenomenon but more on the search for universal categories and principles which underlie the cross language variety of

tense and aspect In particular many of the participants address themselves to the relationship between propositional semantics and discourse pragmatics in so far as these two functional domains interact within tense aspect systems *Tense, aspect and discourse structure* Jakob Egetenmeyer, Sarah Dessì Schmid, Martin G. Becker, 2024-09-23 Tense and aspect are crucial devices of sentence meaning They interact with Aktionsart but also with verb types and adverbs when indicating temporal relations and building temporal discourse structure On the discourse level they are co determined by narrative functions enhancing the complexity of their description The volume depicts this vast field It unites twelve contributions which elaborate on three thematic cores 1 the context sensitivity of tense and aspect and their relationships with neighbouring categories 2 their interaction with adverbs 3 their functioning in discourse The volume advances our knowledge of the matters at hand in different respects It discusses the onomasiological status of categories such temporality and aspectuality critically It addresses the functioning of tense in discourse from various angles A further focus is placed on the imperfective past tense aspect form its uses and meaning potentials Its analysis ranges from marking evidentiality to indicating perspectives The volume combines papers with various theoretical approaches and methodologies notably formally oriented linguistics and data driven accounts The multiplicity of subjects and methods may resonate beyond the field of Romance linguistics

The Second Language Acquisition of French Tense, Aspect, Mood and Modality Dalila Ayoun, 2013-07-04 Temporal aspectual systems have a great potential of informing our understanding of the developing competence of second language learners So far the vast majority of empirical studies investigating L2 acquisition have largely focused on past temporality neglecting the acquisition of the expression of the present and future temporalities with

rare exceptions aside from ESL learners leaving unanswered the question of how the investigation of different types of temporality may inform our understanding of the acquisition of temporal aspectual and mood systems as a whole This monograph addresses this question by focusing on three main objectives a to contribute to the already impressive body of research in the L2 acquisition of tense aspect and mood modality from a generative perspective and in so doing to present a more complete picture of the processes of L2 acquisition in general b to bridge the gap between linguistic theory and L2 acquisition c to make empirical findings more accessible to language instructors by proposing concrete pedagogical applications

Tense, aspect and mood in first and second language acquisition Emmanuelle Labeau, Inès Saddour, 2012-01

Tense aspect and mood have attracted much attention in the areas of both first and second language acquisition but scholars in the two disciplines often fail to learn from each other Western European languages have also been the focus of most studies but there would be lessons to learn from less studied languages This volume offers new insights on tense aspect and mood by bringing together the findings of first and second language acquisition and comparing child and adult monolingual and multilingual learning processes that are approached from various theoretical points of view In addition it spans over a wide range of less studied languages Bulgarian Hebrew Korean Russian and Western European languages are studied from new angles

The L2 Acquisition of Tense-aspect Morphology M. Rafael Salaberry, Yasuhiro Shirai, 2002 The present volume provides a cross linguistic perspective on the development of tense aspect in L2 acquisition Data based studies included in this volume deal with the analysis of a wide range of target languages Chinese English Italian French Japanese and Spanish Theoretical frameworks used to evaluate the nature of the empirical evidence range from generative grammar to functional typological linguistics Several studies focus on the development of past tense markers but other issues such as the acquisition of a future marker are also addressed An introductory chapter outlines some theoretical and methodological issues that serves as relevant preliminary reading for most of the chapters included in this volume Additionally a preliminary chapter offers a substantive review of first language acquisition of tense aspect morphology The analysis of the various languages included in this volume significantly advances our understanding of this phenomenon and will serve as an important basis for future research

Tense and Aspect in English and in German Patricia Schneider, 2010-10-19

Seminar paper from the year 2009 in the subject Didactics for the subject English Pedagogy Literature Studies grade 1 3 University of Freiburg

Englisches Seminar course Proseminar I Contrastive Linguistics language English abstract

As English and German are both Germanic languages they are closely related However there are still a lot of differences to be found when comparing the two languages This is among other things due to the fact that English and German represent different language types Among the grammatical categories relating to which the two languages can be analysed tense and aspect are certainly salient Before starting to analyse both languages with regard to these categories the difference between tense and aspect has to be clarified Tense is both a deictic and a relational category Therefore it locates an event on the time line

usually with reference to the time of speaking Aspect by contrast does not locate an event or situation on the time line nor does it relate the time of one situation to another It is rather concerned with the internal temporal constituency of one situation This term paper will examine how English and German differ in their use and expression of tense and aspect taking the perspective of a learner First the three stages of tense and aspect acquisition by learners will be described in general terms Particular attention will be paid to the influence of instruction on the learners Then this term paper will examine how English and German differ in their use of tense This will be illustrated on the example of the different uses of the perfect Afterwards the focus will be on aspect While English uses the progressive to indicate a change of aspect there is no such formal equivalent in the German language Therefore German learners of English are confronted with the question of how to express this internal constituency of one situation in their mother tongue Various devices that are used by German learners of English to express the progressive will be exemplified Both the section on tense and the section on the progressive will conclude with a focus on the difficulties for and the typical errors made by the learners However as there is no material available concerning English learners of German only the German learners of English will be taken into account

Crosslinguistic Views on Tense, Aspect and Modality Bart Hollebrandse, Angeliek van Hout, Co Vet, 2005 This Cahiers Chronos volume reports on new and ongoing research on tense aspect and modality in which a variety of languages has been gathered The languages discussed by the authors include in alphabetical order Brazilian Portuguese Chinese Dutch English French German Greek Italian Japanese Polish Russian and Spanish The articles form a selection of the papers presented at the 5th Chronos Conference that took place at the University of Groningen the Netherlands in June 2002 We have categorized the papers into three sections Tense Aspect and Modality Obviously this ordering is somewhat arbitrary given that some of the papers cross these rather rigid boundaries as they discuss the interplay of tense and aspect or tense and modality This book is of interest for scholars in the field of semantics logic syntax and comparative linguistics A Formal Semantics of Tense, Aspect and Aktionsarten Werner Saurer, 1984 *Tense, Aspect, Modality, and Evidentiality* Dalila Ayoun, Agnès Celle, Laure Lansari, 2018-08-15 After an introductory chapter that provides an overview to theoretical issues in tense aspect modality and evidentiality this volume presents a variety of original contributions that are firmly empirically grounded based on elicited or corpus data while adopting different theoretical frameworks Thus some chapters rely on large diachronic corpora and provide new qualitative insight on the evolution of TAM systems through quantitative methods while others carry out a constructional analysis of past tensed verbs using inferential statistics to explore the lexical grammar of verbs A common goal is to uncover semantic regularities and variation in the TAM systems of the languages under study by taking a close look at context Such a fine grained approach contributes to our understanding of the TAM systems from a typological perspective The focus on well known Indo European languages e g French German English Spanish and also on less commonly studied languages e g Hungarian Estonian Avar Andi Tagalog provides a valuable cross linguistic perspective
