Brodersen,2012-12-06 A silicon compiler is a software system which can automatically generate an integrated circuit from a user s specification Anatomy of a Silicon Compiler examines one such compiler in detail covering the basic framework and design entry the actual algorithms and libraries which are used the approach to verification and testing behavioral synthesis tools and several applications which demonstrate the system s capabilities   Nanoelectromechanical Relays for Low Power Applications Roozbeh Parsa,2011 CMOS scaling has been very successful in generating small fast low cost electronics However in advanced CMOS nodes the total power consumption is dominated by the static power dissipation which is caused greatly by gate leakage short channel effects and finite subthreshold slope Further scaling of CMOS only exacerbates these problems Nanoelectromechanical NEM relays are promising devices for assisting CMOS systems by reducing the static power dissipation due to their zero leakage current infinite subthreshold slope and scalable actuation voltage Electrostatically

actuated NEM relays are devices where the operation is based on the deformation of a flexible beam under the influence of electrostatic force in order to create a conducting path between two electrodes This work studies the fabrication process development of sidewall coated laterally actuated NEM relays The developed process enables decoupling of the mechanical and electrical properties of the relay allowing independent optimization of each property and paving the path for creating a back end of line BEOL compatible process Furthermore a major failure mechanism of NEM relays is beam to gate shorting after actuation To ameliorate this problem new designs with improved mechanical properties were simulated and tested These designs utilize a stiff electrode and a compliant beam to eliminate undesired beam deformation near the gate electrode These results in addition to variation studies stress outcomes and basic logic functionality of the NEM relays are shown
