Current Catalog ,1988 First multi year cumulation covers six years 1965 70 Moral Emotion, Moral Cognition, and
(Im)Moral Behavior in the Workplace Peixu He,Hongdan Zhao,Cuiling Jiang,Chuangang Shen,2023-09-27 Moral behavior is
subject to socially accepted moral norms and also has a pervasive influence on organizational performance With the
emergence of ethical issues found in organizations practitioners and scholars pay increasing attention to ethics management
Therefore workplace moral behavior e g pro social behavior and organizational citizenship behavior OCB and immoral
behavior e g interpersonal abusive behavior deviant counterproductive behavior and unethical pro organizational behavior
have also received substantial research interests over the past decades To date the most common framework used to study
moral behavior has been the cognitive approach with abundant evidence demonstrating that emotion and cognition are the
two core elements in generating and influencing workplace im moral behavior However limited studies have been conducted
to explore the emotional cognitive processes or integrative moral emotion cognition system relevant to workplace moral
behavior Despite our knowledge of the antecedents and consequences of workplace im moral behaviors more research on the
generating mechanism influencing mechanism transformation mechanism and governance strategies is needed For example
it is unclear how exhibiting im moral behavior in the workplace would impact the actor s and the third party observer s
emotions thoughts feelings and subsequent behavior Besides the question of whether ethical unethical leader behavior would
trigger a trickle down effect is underdeveloped which refers to the fact that how the behavior or perception of the top leaders
affects employees from top to bottom along the formal vertical power chain In addition we have little knowledge on when
how and why the ethical employees the so called good soldiers would engage in workplace immoral behavior and vice versa

[Saving People from the Harm of Death](#) Espen Gamlund, Carl Tollef Solberg, 2019-02-01 Death is something we mourn or fear as the worst thing that could happen whether the deaths of close ones the deaths of strangers in reported accidents or tragedies or our own And yet being dead is something that no one can experience and live to describe This simple truth raises a host of difficult philosophical questions about the negativity surrounding our sense of death and how and for whom exactly it is harmful The question of whether death is bad has occupied philosophers for centuries and the debate emerging in philosophical literature is referred to as the badness of death Are deaths primarily negative for the survivors or does death also affect the deceased What are the differences between death in fetal life just after birth or in adolescence In order to properly evaluate deaths in global health we must find answers to these questions In this volume leading philosophers medical doctors and economists discuss different views on how to evaluate death and its relevance for health policy This includes theories about the harm of death and its connections to population level bioethics For example one of the standard views in global health is that newborn deaths are among the worst types of death yet stillbirths are neglected This raises difficult questions about why birth is so significant and several of the book's authors challenge this standard view This is the first volume to connect philosophical discussions on the harm of death with discussions on population health adjusting the ways in which death is evaluated Changing these evaluations has consequences for how we prioritize different health programs that affect individuals at different ages as well as how we understand inequality in health
