Lewis,Stuart Chinn,Vesla M. Weaver,David R. Mayhew,Sidney M. Milkis,2020-03-04 Political scholars examine the dynamic evolution of laws over time in a volume that pushes the frontiers of knowledge about lawmaking in the US Choice Politics is at its most dramatic during debates over important pieces of legislation And while debates over legislative measures can rage for years or even decades before an item is enacted they also endure long afterward when the political legacy of a law eventually comes into focus With a diverse set of contributors including quantitative political scientists political development scholars historians and economists Living Legislation provides fresh insights into contemporary American politics and public policy Many of the contributors to this volume focus on the question of why some laws stand the test of time while others are eliminated replaced or significantly amended Others discuss how laws emerge from and effect change within coalition structures the effectiveness of laws at mediating partisan conflicts and the ways in which laws interact with broader shifts in the political environment An essential

addition to the study of politics Living Legislation enhances understanding of democracy governance and power Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton, 2014-06-30 The success or failure of foreign policy initiatives in Latin America is heavily influenced by bureaucratic and military background players Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton's comparative study of the nature of conflict between Latin American states during the Cold War provides a counterintuitive and shrewd explanation of why diplomacy does or doesn't work Specifically he develops a theory that shows how the parochial interests of state bureaucracies can overwhelm national leaders foreign policy initiatives and complicate regional alliances His thorough evaluation of several twentieth century Latin American conflicts covers the gamut of diplomatic disputes from border clashes to economic provocations to regional power struggles Darnton examines the domestic political and economic conditions that contribute either to rivalry continued conflict or rapprochement diplomatic reconciliation while assessing the impact of U S foreign policy Detailed case studies provide not only a robust test of the theory but also a fascinating tour of Latin American history and Cold War politics including a multilayered examination of Argentine Brazilian strategic competition and presidential summits over four decades three rivalries in Central America following Cuba's 1959 revolution and how the 1980s debt crisis entangled the diplomatic affairs of several Andean countries These questions about international rivalry and rapprochement are of particular interest to security studies and international relations scholars as they seek to understand what defuses regional conflicts creates stronger incentives for improving diplomatic ties between states and builds effective alliances The analysis also bears fruit for contemporary studies of counterterrorism in its critique of parallels between the Cold War and the Global War on Terror its examination of failed rapprochement efforts between Algeria and Morocco and its assessment of obstacles to U S coalition building efforts *Presidents and the Politics of Agency Design* David E. Lewis, 2004-09-02 The administrative state is the nexus of American policy making in the postwar period The vague and sometimes conflicting policy mandates of Congress the president and courts are translated into real public policy in the bureaucracy As the role of the national government has expanded the national legislature and executive have increasingly delegated authority to administrative agencies to make fundamental policy decisions How this administrative state is designed its coherence its responsiveness and its efficacy determine in Robert Dahl's phrase who gets what when and how This study of agency design thus has implications for the study of politics in many areas The structure of bureaucracies can determine the degree to which political actors can change the direction of agency policy Politicians frequently attempt to lock their policy preferences into place through insulating structures that are mandated by statute or executive decree This insulation of public bureaucracies such as the National Transportation Safety Board the Federal Election Commission and the National Nuclear Security Administration is essential to understanding both administrative policy outputs and executive legislative politics in the United States This book explains why when and how political actors create administrative agencies in such a way as to
