Department of Greek and Roman Antiquities,1908 **From Then to Now** Christopher Moore,2011-10-05 Just 50 000 years ago our hunter gatherer ancestors ventured off the African savannah and into the wider world Now our technology reaches far out into the cosmos How did we get to where we are today With lively text and colorful illustrations From Then to Now explains how individual societies struggled to find their own paths despite war disease slavery natural disasters and the relentless growth of human knowledge From Hammurabi to Henry Ford from Incan couriers to the Internet from the Taj Mahal to the Eiffel Tower from Marco Polo to Martin Luther King from Cleopatra to Catherine the Great from boiled haggis to fried tarantulas this is no less than the story of humanity It s the story of how we grew apart over all those years of migration and division and how as we recognize our common heritage and our often mixed ancestry we can come together An index maps and notes make this a must have reference as well as a delight to

read and to discuss From Then to Now is bound to create a generation of history buffs      *The Archaeology of Art* Andrew Meirion Jones, Andrew Cochrane, 2018-05-20 How can archaeologists interpret ancient art and images if they do not treat them as symbols or signifiers of identity Traditional approaches to the archaeology of art have borrowed from the history of art and the anthropology of art by focusing on iconography meaning communication and identity This puts the archaeology of art at a disadvantage as an understanding of iconography and meaning requires a detailed knowledge of historical or ethnographic context unavailable to many archaeologists Rather than playing to archaeology's weaknesses the authors argue that an archaeology of art should instead play to archaeology's strength the material character of archaeological evidence Using case studies examining rock art figurines beadwork murals coffin decorations sculpture and architecture from Europe the Americas Asia Australia and north Africa the authors develop an understanding of the affective and effective nature of ancient art and imagery An analysis of a series of material based practices from gesture and improvisation to miniaturisation and gigantism assembly and disassembly and the use of distinctions in colour enable key concepts such as style and meaning to be reimagined as affective practices Recasting the archaeology of art as the study of affects offers a new prospectus for the study of ancient art and imagery
