Slaying the Nimby Dragon Herbert Inhaber, 1998 Advanced societies around the world are facing a dilemma What to do with all the facilities that everyone desires in principle but wants to keep out of their own block The phenomenon is called NIMBY Not In My Own Back Yard Herb Inhaber proposes a solution that combines environmental science and economics to wipe it out the reverse Dutch auction

**Slaying the Nimby Dragon** Elena Skrabina, Herbert Inhaber, 2017-10-12 A mob scene erupted in April 1990 in the sleepy hamlet of Caneada a small town on the northern edge of the Allegheny Mountains In addition to riots and numerous arrests six senior citizens handcuffed to a heavy chain formed a human barricade across the steel bridge spanning the Genesee River Their purpose was to prevent the siting commission of a low level radioactive waste dump from getting across the bridge In the past few decades finding sites for undesirable facilities such as prisons and garbage landfills has become ever more difficult The difficulty lies not in tracking down technically suitable sites but in the so called NIMBY syndrome People might agree that a facility is desperately needed just as long as it is Not In My Backyard The unfortunate results of this proverbial game of hot potato are ever mounting social and economic costs State and local governments will continue to spend small fortunes finding sites to facilities that everyone desires in principle but nobody seems to want on their block In Slaying the NIMBY Dragon Herbert Inhaber draws on the experience of many NIMBY cases He discusses new approaches to overcoming NIMBY such as the reverse Dutch auction Reverse because undesirable objects are being auctioned This market approach holds promise for meeting the objections of potential neighbors of a LULU Locally Unwanted Land Use as well as society's need to get the facilities built According to Inhaber a site auction works better than negotiation the community handles it on their own and when they are satisfied with a site they offer a bid The hefty bonus would go to the first county that agrees to have a site built in their backyard Psychological components of the NIMBY syndrome are also discussed logical objections and why people think as they do about LULUs Inhaber believes that the trick to handling this problem is to take account of these personal sentiments and accomplish the nation's work at the same time Inhaber adopts an optimistic approach to a problem that many believe has become a national fixture with no solution The nuclear industry has been trying without success to dispose of its waste for about four decades to take just one example Inhaber believes there is a way to assuage the fears of an affected community while simultaneously preserving the environment and the people This book will be of interest to environmentalists developers policymakers and those in the fields of waste industry nuclear and risk analysis

Daniel P. Aldrich, 2011-03-15 One of the most vexing problems for governments is building controversial facilities that serve the needs of all citizens but have adverse consequences for host communities Policymakers must decide not only where to locate often unwanted projects but also what methods to use when interacting with opposition groups In *Site Fights* Daniel P. Aldrich gathers quantitative evidence from close to five hundred municipalities across Japan to show that planners deliberately seek out acquiescent and unorganized communities for such facilities in order to minimize conflict When protests arise over nuclear power plants dams and airports agencies regularly rely on the coercive powers of the modern state such as land expropriation and police repression Only under pressure from civil society do policymakers move toward financial incentives and public relations campaigns Through fieldwork and interviews with bureaucrats and activists Aldrich illustrates these dynamics with case studies from Japan France and the United States The incidents highlighted in *Site Fights* stress the importance of developing engaged civil society even in the absence of crisis thereby making communities both less attractive to planners of controversial projects and more effective at resisting future threats **Arguments and Fists**

Mika LaVaquerie, 2002-03-22 Many theorists have addressed a central concern of current political theory by contending that the dithering intellectualism of left politics prevents genuine political action *Arguments and Fists* confronts this concern by refuting these arguments and reconciling philosophical debates with the realities of current activism By looking at theorists such as Montesquieu Kant Rousseau the book contradicts current academic debates and also goes against contemporary theory's image of the liberal political agent as a narrowly rational abstraction Mika LaVaquerie also argues that

progressive political philosophy and political action go hand in hand He then ventures past Kant and Rousseau to talk about specific environmental activism finding middle ground between the two while asserting that the liberal urge for political reform stems from sound philosophical considerations about the nature of politics and isn't the cowardly afterthoughts some theorists have called it Arguments and Fists then puts these theoretical insights to use examining environmental justice movements and varieties of environmental radicalism showing how liberal theory illuminates concrete contemporary political practices
