Hayes, 2007-12-26 The classic medical text known as Gray's Anatomy is one of the most famous books ever written Now on the 150th anniversary of its publication acclaimed science writer and master of narrative nonfiction Bill Hayes has written the fascinating never before told true story of how this seminal volume came to be A blend of history science culture and Hayes s own personal experiences The Anatomist is this author's most accomplished and affecting work to date With passion and wit Hayes explores the significance of Gray's Anatomy and explains why it came to symbolize a turning point in medical history But he does much much more Uncovering a treasure trove of forgotten letters and diaries he illuminates the astonishing relationship between the fiercely gifted young anatomist Henry Gray and his younger collaborator H V Carter whose exquisite anatomical illustrations are masterpieces of art and close observation Tracing the triumphs and tragedies of these two extraordinary men Hayes brings an equally extraordinary era the mid 1800s unforgettably to life But the journey Hayes takes us on is not only outward but inward through the blood and tissue and organs of the human body for The Anatomist chronicles Hayes s year as a student of classical gross anatomy performing with his own hands the dissections and examinations detailed by Henry Gray 150 years ago As Hayes s acquaintance with death deepens he finds his understanding and appreciation of life deepening in unexpected and profoundly moving ways The Anatomist is more than just the story of a book It is the story of the human body a story whose beginning and end we all know and share but that like all great stories is infinitely rich in **Hallucinations** Oliver Sacks, 2012-11-06 NATIONAL BESTSELLER The poet laureate of medicine The New York between Times and author of The Man Who Mistook His Wife for a Hat weaves together stories of mind altering experiences to reveal what they tell us about our brains our folklore and culture and why the potential for hallucination exists in us all Sacks has turned hallucinations from something bizarre and frightening into something that seems part of what it means to be a person His book too is a medical and human triumph The Washington Post An absorbing plunge into a mystery of the mind Entertainment Weekly To many people hallucinations imply madness but in fact they are a common part of the human experience These sensory distortions range from the shimmering zigzags of a visual migraine to powerful visions brought on by fever injuries drugs sensory deprivation exhaustion or even grief Hallucinations doubtless lie behind many mythological traditions literary inventions and religious epiphanies Drawing on his own experiences a wealth of clinical cases from among his patients and famous historical examples ranging from Dostoevsky to Lewis Carroll the legendary neurologist Oliver Sacks

investigates the mystery of these sensory deceptions what they say about the working of our brains how they have influenced our folklore and culture and why the potential for hallucination is present in all humans The Readers' Advisory Guide to Nonfiction Neal Wyatt, 2007-05-14 Navigating what at she calls the extravagantly rich world of nonfiction renowned readers advisor RA Wyatt builds readers advisory bridges from fiction to compelling and increasingly popular nonfiction to encompass the library s entire collection She focuses on eight popular categories history true crime true adventure science memoir food cooking travel and sports Within each she explains the scope popularity style major authors and works and the subject s position in readers advisory interviews Wyatt addresses who is reading nonfiction and why while providing RAs with the tools and language to incorporate nonfiction into discussions that point readers to what to read next In easy to follow steps Wyatt Explains the hows and whys of offering fiction and nonfiction suggestions together Illustrates ways to get up to speed fast in nonfiction Shows how to lead readers to a variety of books using her read around and reading map strategies Provides tools to build nonfiction subject guides for the collection This hands on guide includes nonfiction bibliography key authors benchmark books with annotations and core collections It is destined to become the nonfiction bible for readers advisory and collection development helping librarians library workers and patrons select great reading from the entire **Human Technological Enhancement and Theological Anthropology** Victoria library collection Out .2002 Lorrimar, 2022-05-05 A cross disciplinary theological engagement with proposals for the technological enhancement of humans including radical life extension mind uploading mood enhancement and moral enhancement This work draws on metaphor studies cognitive sciences and literary studies to develop an account of human creativity in relation to divine Mapping the Darkness Kenneth Miller, 2023-10-03 WINNER OF THE 2024 ASJA BOOK AWARD BIOGRAPHY creativity HISTORY NAMED A BEST BOOK OF THE YEAR 2023 BY THE NEW YORKER NEW YORK TIMES EDITOR S CHOICE SELECTION From award winning journalist Kenneth Miller comes the definitive story of the scientists who set out to answer two questions Why do we sleep and How can we sleep better A century ago sleep was considered a state of nothingness even a primitive habit that we could learn to overcome Then an immigrant scientist and his assistant spent a month in the depths of a Kentucky cave making nationwide headlines and thrusting sleep science to the forefront of our consciousness In the 1920s Nathaniel Kleitman founded the world's first dedicated sleep lab at the University of Chicago where he subjected research participants including himself to a dizzying array of tests and tortures But the tipping point came in 1938 when his cave experiment awakened the general public to the unknown and vital world of sleep Kleitman went on to mentor the talented but troubled Eugene Aserinsky whose discovery of REM sleep revealed the astonishing activity of the dreaming brain and William Dement a jazz bass playing revolutionary who became known as the father of sleep medicine Dement in turn mentored the brilliant maverick Mary Carskadon who uncovered an epidemic of sleep deprivation among teenagers and launched a global movement to fight it Award winning journalist Kenneth Miller weaves together science and history to tell
