Lives of the Artists Giorgio Vasari, 2003-07-31 Beginning with Cimabue and Giotto in the thirteenth century Vasari traces the development of Italian art across three centuries to the golden epoch of Leonardo and Michelangelo Great men and their immortal works are brought vividly to life as Vasari depicts the young Giotto scratching his first drawings on stone Donatello gazing at Brunelleschi s crucifix and Michelangelo s painstaking work on the Sistine Chapel harassed by the impatient Pope Julius II The Lives also convey much about Vasari himself and his outstanding abilities as a critic inspired by his passion for art

When the Asteroid Hits Allen A. Debus, 2024-10-04 The incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries

Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded

Transactions of the International Astronomical Union: Reports on Astronomy C. de Jager, 2012-12-06 This volume contains the fifteenth tri annual reports of the Presidents of the forty Commissions of the International Astronomical Union it refers to the progress in our discipline during the three years 1970 1971 and 1972 As compared to earlier volumes a gradual change in character is unmistakable The ever increasing flow of publications combined with the obvious necessity to keep the Reports at a reasonable size and price level has gradually forced the Commission Presidents to be more selective than before in drafting their Reports I have certainly stimulated them into that direction in order that Reports like these be valuable and lasting it seems imperative that the individual contributions have the character of a critical overall review where a fairly complete summary is given of the major developments and discoveries of the past three years and in which the broad developments and new trends be clearly outlined while at the same time essential problems for future research are identified With respect to the latter item I have suggested the Commission Presidents to add to their reports a brief section on scientific priorities for future research in the field of their Commissions In order to save space I have suggested to Commission Presidents that references to published papers are given on the basis of their number in the published issues of *Astronomy and Astrophysics Abstracts* For instance the indication 06 078 019 or AAA 06 078 [The Robert Silverberg](#)
