Photographs, Museums, Collections Elizabeth Edwards, Christopher Morton, 2015-05-19 The status of photographs in the history of museum collections is a complex one From its very beginnings the double capacity of photography as a tool for making a visual record on the one hand and an aesthetic form in its own right on the other has created tensions about its place in the hierarchy of museum objects While major collections of art photography have grown in status and visibility photographs not designated art are often invisible in museums Yet almost every museum has photographs as part of its ecosystem gathered as information corroboration or documentation shaping the understanding of other classes of objects and many of these collections remain uncatalogued and their significance unrecognised This volume presents a series of case studies on the historical collecting and usage of photographs in museums Using critically informed empirical investigation it explores substantive and historiographical questions such as what is the historical patterning in the way photographs have been produced collected and retained by museums How do categories of the aesthetic and evidential shape the history of collecting photographs What has been the work of photographs in museums What does an understanding of photograph collections add to our understanding of collections history more broadly What are the methodological demands of research on photograph collections The case studies cover a wide range of museums and collection types from art galleries to maritime museums national collections to local history museums and international perspectives including Cuba France Germany New Zealand South Africa and the UK Together they offer a fascinating insight into both the history of collections and collecting and into the practices and poetics of archives across a range of disciplines including the history of science

Williams, 2016-02-24 This cultural history of mainline Protestantism and American cities most notably New York City focuses on wealthy urban Episcopalians and the influential ways they used their money Peter W Williams argues that such Episcopalians many of them the country s most successful industrialists and financiers left a deep and lasting mark on American urban culture Their sense of public responsibility derived from a sacramental theology that gave credit to the material realm as a vehicle for religious experience and moral formation and they came to be distinguished by their participation in major aesthetic and social welfare endeavors Williams traces how the church helped transmit a European inflected artistic patronage that was adapted to the American scene by clergy and laity intent upon providing moral and aesthetic leadership for a society in flux Episcopalian influence is most visible today in the churches cathedrals and elite boarding schools that stand in many cities and other locations but Episcopalians also provided major support to the formation of stellar art collections the performing arts and the Arts and Crafts movement Williams argues that Episcopalians thus helped smooth the way for acceptance of materiality in religious culture in a previously iconoclastic Puritan influenced society *Art and Its Publics* Andrew McClellan, 2008-04-15 Bringing together essays by museum professionals and academics from both sides of the Atlantic Art and its Publics tackles current issues confronting the museum community and seeks to further the debate between theory and practice around the most pressing of contemporary concerns Brings together essays that focus on the interface between the art object its site of display and the viewing public Tackles issues confronting the museum community and seeks to further the debate between theory and practice Presents a cross section of

Exchanges between Literature and Science from the 1800s to the 2000s Márcia Lemos, 2017-03-07 This collection of essays responds to the intense interest that the relations between the discourses of literature and other cultural practices and those of science have obtained throughout various fields of study Spanning a period between the mid nineteenth century and the twenty first century the work collected here is firmly focused on the cultural significance of scientific discoveries and practices and especially on the manifold representations of science and scientists in literature and the arts Its four sections develop from an initial moment of dwindling indefiniteness of borders between literature and the sciences to the historical perception of an increasing divide between the two cultures to use C P Snow s influential expression as well as calls for a form of convergence or consilience in Edward Wilson s words The final section turns to the medical sciences a porous scientific discipline in relation to the humanities which suggests that consilience can already be found partially in specific areas As such this collection contributes towards critically extending that integration through the discussion of key literary representations of science its promises and its problems

Girolamo Della Torre a feudal lord with a castle and other properties in the Friuli and Giulia Bembo grand niece of Cardinal Pietro Bembo and daughter of Gian Matteo Bembo a powerful Venetian senator with a distinguished career in service to the Venetian Republic Their marriage in the mid sixteenth century might be regarded as emblematic of the Venetian experience with the metropole at the center of a fragmented empire a Terraferma nobleman and the daughter of a Venetian senator who raised their family in far off Crete in the stato da mar in Venice itself and in the Friuli and the Veneto in the stato da terra The fortunes and misfortunes of the nine surviving Della Torre children and their descendants tracked through the end of the Republic in 1797 are likewise emblematic of a change in feudal culture from clan solidarity to individualism and intrafamily strife and ultimately redemption Despite the efforts by both the Della Torre and the Bembo families to preserve the patrimony through a succession of male heirs the last survivor in the paternal bloodline of each was a daughter This epic tale highlights the role of women in creating family networks and opens a precious window into a contentious period in which Venetian republican values clash with the deeply rooted feudal traditions of honor and blood feuds of the mainland
