The Philosophy Of Ordinary And Extraordinary Dreaming:

The Philosophy of Penelope Maddy Sophia Arbeiter, Juliette Kennedy, 2024-10-15 This volume features more than 20 essays that explore the work of one of the most important contemporary philosophers of mathematics. It will help readers to better appreciate this significant and prolific philosopher. Within philosophy of mathematics, Penelope Maddy initially advocated realism. She then went on to advance naturalism. Both of her positions became very influential in the field along with her other work in the philosophy of logic. The contributors comment on and otherwise engage with Maddy's work. They also weigh in on the state of set theory and its philosophy, the philosophy and history of logic, naturalism, skepticism, and the myriad other areas to which Maddy left her mark. Overall, coverage traces her influence on these various ideas over the years. It will also help readers to better understand how philosophers working at the forefront of these areas see these concepts today. These essays will be essential reading for the wide group of philosophers working in these different areas as well as graduate students studying philosophy of mathematics and logic and the other related issues to which Maddy has contributed. The volume will also appeal to logicians and set theorists in general as well as to philosophers working in analytic philosophy more widely as well as to those working in the history of philosophy.

In this book Penelope Maddy describes and practises a particularly austere form of naturalism called Second Philosophy. Without a definitive criterion for what counts as science and what doesn't, Second Philosophy can't be specified directly: trust only the methods of science or some such thing, so Maddy proceeds instead by illustrating the behaviours of an idealized inquirer she calls the Second Philosopher. This Second Philosopher begins from perceptual common sense and progresses from there to systematic observation, active experimentation, theory formation and testing, working all the while to assess, correct and improve her methods as she goes. Second Philosophy is then the result of the Second Philosopher's investigations. Maddy delineates the Second Philosopher's approach by tracing her reactions to various familiar, skeptical and transcendental views: Descartes, Kant, Carnap, late Putnam, van Fraassen, comparing her methods to those of other self-described naturalists, especially Quine, and examining a prominent contemporary debate between disquotationalists and correspondence theorists in the theory of truth to extract a properly second philosophical line of

thought She then undertakes to practise SecondPhilosophy in her reflections on the ground of logical truth the methodology ontology and epistemology of mathematics and the general prospects for metaphysics naturalized The Present Age and Inner Life; a sequel to Spiritual Intercourse.
