The Place Of The Humanities In Medicine:

The Place of the Humanities in Medicine Eric J. Cassell, 1984 The contribution of the humanities to medicine is considered with attention to the classic view existing programs in medical school and obstacles to continued or increased participation by the humanities A shift is occurring in medicine toward a primary concern for sick persons instead of disease alone Specific values of teaching literature historical referents philosophy the tools of teaching communication skills and reasoning are identified Literature offers the opportunity to see the interplay of illness and persons including the role of physicians in the lives of others and the perception of physicians by laypersons In addition to providing a historical context for viewing medicine and science history provides a methodology and understanding of time and process Teaching doctors how to think about both the body and about persons i e the objective and subjective data and values in formulating patient care goals allows them to integrate knowledge of medical science the body and the everyday life and function of individual sick persons It is argued that medicine has demands to make of the humanities that may exceed what humanists are willing to or able to offer In the process of meeting medicine s changing needs humanities view of their own nature and function may also change SW

and the practical in a single resource from leading experts in the field **Theological Analyses of the Clinical Encounter** G.P. McKenny, J.R. Sande, 2013-04-17 Efforts to evaluate the clinical encounter in terms of autonomous agents governed by rationally justified moral principles continue to be criticised These essays written by physicians ethicists theologians and philosophers examine various models of the clinical encounter emerging out of these criticisms and explore the prospects they offer for theological and religious discourse Individual essays focus on the reformulation of covenant models revisions of principles approaches and topics such as power authority narrative rhetoric dialogue and alterity The essays display a range of conclusions about whether theology articulates generally accessible religious insights or is a tradition specific discipline Hence the volume reflects current debates in theology while analysing current models of the clinical encounter Students professionals and scholars who find themselves at the intersection of theology and medicine will welcome these voices in an ongoing conversation **The Nature of Suffering and the Goals of Medicine** Eric J. Cassell Clinical Professor of Public Health Cornell University Medical College, 1991-10-03 The Nature of Suffering underscores the change that is taking place in medicine from a basic concern with disease to a greater focus on the sick person Cassell centers his discussion on the problem of suffering because he says its recognition and relief are a test of the adequacy of any system of medicine He describes what suffering is and its relationship to the sick person bodies do not suffer people do An exclusive concern with scientific knowledge of the body and disease therefore impedes an understanding of suffering and diminishes the care of the suffering patient The growing criticism that medicine is not sufficiently humanistic does not go deep enough to provide a basis for a new understanding of medicine New concepts in medicine must have their basis in its history and in the development of ideas about disease and treatment Cassell uses many stories about patients to demonstrate that despite the current dominance of science and technology there can be no diagnosis search for the cause of the patient's disease prognostication or treatment without consideration of the individual sick person Recent trends in medicine and society Cassell believes show that it is time for the sick person to be not merely an important concern for physicians but the central focus of medicine He addresses the exciting problems involved in such a shift In this new medicine doctors would have to know the person as well as they know the disease What are persons however and how are doctors to comprehend them The kinds of knowledge involved are varied including values and aesthetics as well as science In the process of knowing the experience of patient and doctor move to center stage He believes that the exploration of the person will engage medicine in the 21st century just as understanding the body has occupied the last hundred years Medicine in Quotations Edward J. Huth, T. J. Murray, 2006 Who was the first to write about a certain disease diagnose it and treat it This book answers those questions for a wide range of diseases from Abetalipoproteinemia to Zollinger Ellison syndrome What were the medical practitioners of previous generations hoping to achieve What were their patients expecting of them The answers are found in these quotations Containing over 3 000 entries and now updated with more than 450 new quotations this new edition of

Performance and medicine are now converging in unprecedented ways. London's theatres reveal an appetite for medical themes. John Boyega is subjected to medical experiments in Jack Thorne's *Woyceke*, while Royal National Theatre produces a novel musical about cancer. At the same time, performance makers seek to improve our health using dance to increase mobility for those living with Parkinson's disease or performance magic as physiotherapy for children with paraplegia. *Performance, Medicine and the Human* surveys this emerging field, providing case studies based on the author's own experience of devising medical performances in collaboration with cancer patients, biomedical scientists, and healthcare educators. Examining contemporary medical performance reveals an ancient preoccupation evident in the practices of both theatre and healing with the human. Like medicine, theatre puts the human on display in order to understand and perhaps alleviate the suffering inherent to the human condition. Medical practice constitutes a sort of theatre in which doctors, nurses, and patients perform their humaneness and humanity. This insight has much to offer at a time when established notions of the human are being radically rethought, partly in response to emerging biomedical knowledge. *Performance, Medicine and the Human* argues that contemporary medical performance can shed new light on what it means to be human and what we mean by the human, the humane, humanism, and the humanities at a time when these notions are being fundamentally rethought. Its insights are relevant to scholars in performance studies, the medical humanities, healthcare education, and beyond.

Patient-Centred Medicine in Transition Alan Bleakley,2014-01-27 This book challenges functional models for more aesthetic and ethical models where communication is grounded in values systems of cultures Here communication is treated as a distributed phenomenon involving networks of persons activities and artifacts and extends beyond doctor patient relationships to working in and across teams around patients The purpose of the book is to stimulate thinking about how patient care and safety may be improved through a focus upon the non technical work of doctors interpersonal communication teamwork and situation awareness in teams The focus is then not on the personality of the doctor but on the dynamics of relationships which form doctors multiple identities **Humanity in Medicine** Kerry Breen,2022-04-29 In 1940 soon after graduating Dr Stanley Goulston joined the Australian Army As the sole doctor to 1500 soldiers he was sent to the Middle East where the Allied forces were fighting the Germans and Italians His battalion was part of the iconic Rats of Tobruk during the famous siege At Tobruk he was awarded a Military Cross In 1947 he was appointed honorary physician to the Royal Prince Alfred Hospital in Sydney He became one of Australia s first gastroenterologists and advanced this speciality at his hospital and beyond In senior roles with the Royal Australasian College of Physicians he headed a long lasting redesign of physician training Stanley Goulston was universally admired for his humility empathy and commitment to teaching and research For most of his life he wrote poetry At 79 he completed a Master of Philosophy degree at Sydney University and then taught narrative and poetry to doctors and medical students with the aim of fostering a more humane and compassionate version of modern scientific medicine
