Coleman,2021-02-04 This book offers an in depth analysis of how local community radio practitioners have embraced the digital revolution Digital Innovations and the Production of Local Content in Community Radio contextualizes the UK model of community radio before focussing on specific case studies to examine how the use of digital technologies has affected local radio production practices The book offers an overview of the new technologies media forms and platforms in radio production shedding light on how digitalization is impacting the routines and experiences of a predominantly volunteer based workforce The author presents the argument that despite the benefits of digital media traditional aspects of programme production continue to be of vital importance to the interpersonal relationships and values of community radio This book will appeal to academics and researchers in the areas of communication culture journalism studies media and creative industries     Stereo: Comparative Perspectives on the Sociological Study of Popular Music in France and Britain Philippe Le Guern,2016-04-01 The term Popular Music has traditionally denoted different things in France and Britain In France the very concept of popular music has been fiercely debated and contested whereas in Britain and more largely throughout what the French describe as the Anglo saxon world popular music has been more readily accepted as a description of what people do as leisure or consume as part of the music industry and as something that academics are legitimately entitled to study French researchers have for some decades been keenly interested in reading British and American studies of popular culture and popular music and have often imported key concepts and methodologies into their own work on French music but apart from the widespread use of elements of French theory in British and American research the Anglo saxon world has remained largely ignorant of particular traditions of the study of popular music in France and specific theoretical debates or organizational principles of the making and consuming of French musics French British and American research into popular music has thus coexisted with considerable cross fertilization for many years but the barriers of language and different academic traditions have made it hard for French and anglophone researchers to fully appreciate the ways in which popular music has developed in their respective countries and the perspectives on its study adopted by their colleagues This volume provides a comparative and contrastive perspective on popular music and its study in France and the UK     The History of Broadcasting in the United Kingdom: Volume V: Competition Asa Briggs,1995-03-23 Part of a five volume history of the rise and development of broadcasting in the United Kingdom
