Cloning Stephen D. Fairbanks, 2004 The terms recombinant DNA technology DNA cloning molecular cloning or gene cloning all refer to the same process the transfer of a DNA fragment of interest from one organism to a self replicating genetic element such as a bacterial plasmid The DNA of interest can then be propagated in a foreign host cell This technology has been around since the 1970s and it has become a common practice in molecular biology labs today Reproductive cloning is a technology used to generate an animal that has the same nuclear DNA as another currently or previously existing animal Dolly was created by reproductive cloning technology In a process called somatic cell nuclear transfer SCNT scientists transfer genetic material from the nucleus of a donor adult cell to an egg whose nucleus and thus its genetic material has been removed The reconstructed egg containing the DNA from a donor cell must be treated with chemicals or electric current in order to stimulate cell division Once the cloned embryo reaches a suitable stage it is transferred to the uterus of a female host where it continues to develop until birth Therapeutic cloning also called embryo cloning is the production of human embryos for use in research The goal of this process is not to create cloned human beings but rather to harvest stem cells that can be used to study human development and to treat disease Stem cells are important to biomedical researchers because they can be used to generate virtually any type of specialised cell in the human body This new book presents an up to date Chronology of Cloning along with current and selected abstracts dealing with cloning as well as a guide to books on the topic Access to the abstract and books sections is provided by title subject and author indexes

Wood, 2010-05-11 An anecdotal rollicking tour through America's most colorful region From the Tidewater through Appalachia down the Blue Ridge country and into the sunbelt B C Hall and C T Wood take us through the American South inviting us to listen to its music blues country gospel and rock and to the voices that have shaped its extraordinary distinctive literature Interweaving interviews with people both ordinary and famous with thought provoking reflections on Southern life history politics humor religion and cultural icons The South is a matchless impressionistic portrait of a people and a place Русский Язык N. Zwarg,2020-10-15 Focusing on U S slavery and its aftermath in the nineteenth century The Archive of Fear explores the traumatic force field that continued to inflect discussions of slavery and abolition both before and after the Civil War It challenges the long assumed distinction between psychological and cultural historical theories of trauma discovering a virtual dialogue between three central U S writers and Sigmund Freud concerning the traumatic response of slavery s perpetrators A strain of trauma theory and practice comes alive in the temporal and spatial disruptions of New World slavery and The Archive of Fear shows how key elements of that theory still inform the infrastructure of race relations today It argues that trauma theory before Freud first involves a return to an overlap between crisis insurrection and mesmerism found in the work of Frederick Douglass Harriet Beecher Stowe and W E B Du Bois Mesmer s crisis state has long been read as the precursor to hypnosis the tool Freud famously rejected when he created psychoanalysis But the story of what was lost to trauma theory when Freud adopted the talk cure can be told through cultural disruptions of New World slavery especially after mesmerism arrived in Saint Domingue where its implication in the Haitian revolution in both reality and fantasy had an impact on the history of emancipation in the United States
