The Photography Of Architecture Twelve Views:

The Photography of Architecture Akiko Busch, 1987 This book examines the development of architectural photography and its growing influence on our own perceptions of architecture Including spectacular black and white photographs from the early days of architectural photography through contemporary selections this volume also contains interviews with twelve leading architectural photographers In addition it provides documentation of some of this century s finest architectural achievements Those who established the profession in the 1930s Ezra Stoller Julius Shulman Bill Hedrich discuss their philosophies approaches and backgrounds Interviews with younger photographers explore the debt owed to their predecessors as well as their unique contributions Site web lensculture com *Visioning Technologies* Graham Cairns, 2016-12-08 *Visioning Technologies* brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight understood to include orthographic projection perspective drawing telescopic devices photography film and computer visualization amongst others Each chapter deals with its own area and historical period of expertise organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today Paradoxically it is premised on the argument that these technological systems tend in their initial formulations to obtain ever greater realism in our visualizations of the physical world Active Landscape Photography Anne C Godfrey, 2023-04-28 *Diverse Practices* the third book in the *Active Landscape Photography* series presents a set of unique photographic examples for site specific investigations of landscape places Contributed by authors across academia practice and photography each chapter serves as a rigorous discussion about photographic methods for the landscape and their underlying concepts Chapters also serve as unique case studies about specific projects places and landscape issues Project sites include the Miller Garden Olana XX Miller Prize and the Philando Castile Peace Garden Landscape places discussed include the archeological landscapes of North Peru watery littoral zones the remote White Pass in Alaska Sau Paulo and New York City s Chinatown Photographic image making approaches include the use of lidar repeat photography collage mapping remote image capture portraiture image mining of internet sources visual impact assessment cameraless photography transect walking and interviewing These diverse practices demonstrate how photography when utilized through a set of specific critical methods becomes a rich process for investigating the landscape Exploring this concept in relationship to specific contemporary sties and landscape issues reveals the intricacy and subtlety that exists when photography is used actively Practitioners academics students and researchers will be inspired by the underlying concepts of these examples and come away with a better understanding about how to create their own rigorous photographic
