depression carcinogenesis photo damage and photo aging The results of these studies have enabled other scientists to investigate the same phenomena in human organs such as the skin and the eye UV radiation damages hair as well The present knowledge in these fields is summarized in some of the chapters of this monograph Mass phenomenon in Europe with the generalization of summer vacations which were a consequence of social reforms introducing the concept of paid vacations This created a need for protection and opened a market for sunscreens This monograph is concerned with sun protection as a whole and is not just another book on sunscreens Nonetheless in these days of general concern it is important to learn about the efficiency of sunscreens Several authors discuss how to reduce the number of impinging photons and explain why sunscreens seem to offer less protection than expected Guidelines are given on how to use sunscreens in everyday life which are expressed rigorously though clearly for access to the common reader Our knowledge on the relationship between sun and humans is at the early stages of development Industrial and commercial activities are concerned by the development of this knowledge and rules have been and will be promulgated to guarantee efficacy and safety of sun products It is hoped that this monograph will be of interest to the scholar the layman and the legislator
