Antal,2023-09-28 a useful addition to the literature of the changing character of war Its scoping and focus and its application of the identified disruptors to current challenges offer immediate insights for today's commanders and defence policymakers The Wavell Room The nature of war is constant change We live in an era of exponential technological

acceleration which is transforming how wars are waged Today the battlespace is transparent multi domain sensors can see anything and long range precision fire can target everything that is observed Autonomous weapons can be unleashed into the battlespace and attack any target from above hitting the weakest point of tanks and armored vehicles The velocity of war is hyper fast Battle shock is the operational informational and organizational paralysis induced by the rapid convergence of key disrupters in the battlespace It occurs when the tempo of operations is so fast and the means so overwhelming that the enemy cannot think decide or act in time Hit with too many attacks in multiple domains all occurring simultaneously the enemy is paralyzed In short the keys to decisive victory in war is to generate battle shock Imagine a peer fight against Communist China a new war in Europe against a resurgent Russia or a conflict against Iran in the Middle East How can our forces survive an enemy first strike in these circumstances Can we adapt to the ever accelerating tempo of war Will our forces be able to mask from enemy sensors How will leaders execute command and control in a degraded communications environment Will our command posts survive Will our commanders see and understand what is happening in order to plan decide and act in real time This book addresses these tough questions and more
