The Intrinsic Quality of Skin Peter A. Jackson, 1994 **The Skin of the Film** Laura U. Marks, Dana Polan, 2000-01-19
Uses Deleuze to explore new ways of looking at intercultural and experimental cinema Bioengineering and the Skin R. Marks, 2012-12-06 R MARKS Biology has become a numbers game The advantages of being able to grade changes in tissue submit results to statistical analysis and accurately record biological phenomena make measurement essential This is as true for the various disciplines in applied biology as it is for the more esoteric aspects of the subject Regrettably skin in biology until recently had not seized the opportunities that the availability of their tissue of interest afforded and fell behind in the exploration of measurement techniques Probably this resulted in part from the mistaken sentiment that to see is to know It also originated from the complexity of the skin which as a closely interwoven mixture of tissue types makes assessments technically difficult However we are optimistic about the future The International Society for Bioengineering and the Skin was formed in Cardiff in July 1979 in response to the wishes of the delegates who had attended the first International Symposium on the subject in Miami in 1976 and the second in Cardiff 3 years later This volume is the proceedings of the Cardiff meeting We believe that it demonstrates the brave efforts and variety of new ideas that characterise the studies of scientists who realise the importance of blending the physical sciences with skin biology *Speaking of Spain* Antonio Feros, 2017-04-03 Cover Title Page Copyright Dedication Contents List of Maps Introduction 1 Spains 2 Spaniards 3 The Others Within 4 The Others Without 5 A New Spain a New Spaniard 6 Race and Empire 7 From Empire to Nation Conclusion Notes Acknowledgments Index *The Body of the Conquistador* Rebecca Earle, 2012-04-23 This fascinating history explores the dynamic relationship between overseas colonisation and the bodily experience of eating It reveals the importance of food to the colonial project in Spanish America and reconceptualises the role of European colonial expansion in shaping the emergence of ideas of race during the Age of Discovery Rebecca Earle shows that anxieties about food were fundamental to Spanish understandings of the new environment they inhabited and their interactions with the native populations of the New World Settlers wondered whether Europeans could eat New World food whether Indians could eat European food and what would happen to each if they did By taking seriously their ideas about food we gain a richer understanding of how settlers understood the physical experience of colonialism and of how they thought about one of the central features of the colonial project The result is simultaneously a history of food colonialism and race The Sense of Adharma Ariel Glucklich, 1994-04-28 Addressing one of the most difficult conceptual topics in the study of classical Hinduism Ariel Glucklich presents a rigorous phenomenology of dharma or order The work moves away from the usual emphasis on symbols and theoretical formulations of dharma as a religious and moral norm Instead it focuses on images that emerge from the basic experiential interaction of the body in its spatial and temporal contexts such as the sensation of water on the skin during the morning purification or the physical manipulation of the bride during the marriage ritual Images of dharma are examined in

myths rituals art and even the physical landscape of the Hindu world The varied and contingent experiences of dharma infuse it with a meaning that transcends a false analytical distinction from adharma or chaos Glucklich shows that when dharma is experienced by means of living images it becomes inescapably temporal and therefore inseparable from adharma

Skin Color, Power, and Politics in America

Mara Cecilia Ostfeld, Nicole Yadon, 2022-04-30 A person s skin color affects their life experiences including income educational attainment health outcomes exposure to discrimination interactions with the criminal justice system and one s sense of ethnoracial group belonging But do these disparate experiences affect the relationship between skin color and political views In Skin Color Power and Politics in America political scientists Mara Ostfeld and Nicole Yadon explore the relationship between skin color and political views in the U S among Latino Black and White Americans They examine how skin color influences an individual s politics and whether a person s political views influence how they assess their own skin color Ostfeld and Yadon surveyed over 1 300 people about their political views including party affiliation their opinions on welfare and the importance of speaking English in the U S The authors created a matrix grounded in their Roots of Race framework which predicts the relationship between skin color and political attitudes for each ethnoracial group based on the blurriness of the group s boundaries and historical levels of privilege They draw upon three distinct measures of skin color to conceptualize the relationship between skin color and political views Machine Rated Skin Color measured with a light reflectance meter Self Assessed Skin Color using the Yadon Ostfeld Skin Color Scale and Skin Color Discrepancy the difference between one s Machine Rated and Self Assessed Skin Color Ostfeld and Yadon examine patterns that emerge among these measures and their relationships with life experiences and political stances Among Latinos a group with relatively blurry group boundaries and low levels of historical privilege the authors find a robust relationship between political views and Self Assessed Skin Color Latinos who overestimate the lightness of their skin color are more likely to hold conservative views on current racialized political issues such as policing Latinos who overestimate the darkness of their skin color on the other hand are more likely to hold liberal political views As America s major political parties remain divided on issues of race this suggests that for Latinos self reported skin color is used as a means of aligning oneself with valued political coalitions African Americans another group with low levels of historical privilege but with more clearly defined group boundaries demonstrated no significant relationship between skin color and political attitudes Thus the lived

experiences associated with being African American appeared to supersede the differences in life experiences due to skin color Whites a group with more historical privilege and increasingly blurry group boundaries showed a clear relationship between machine assessed skin color and attitudes on political issues Those with darker Machine Rated Skin Color are more likely to hold conservative views suggesting that they are responding to the threat of losing their privilege in a multicultural society At a time when the U S is both more diverse and politically divided Skin Color Power and Politics in America is a timely account of the ways in which skin color and politics are intertwined **The Principles of Money** James Laurence Laughlin, 1903 **Dear Uncle Go** Peter A. Jackson, 1995 The Sense of Beauty George Santayana, 1955-01-01 The great philosopher essayist poet and novelist masterfully offers his fascinating outline of Aesthetics Theory Drawing on the art literature and social sciences involved Santayana discusses the nature of beauty form and expression The Task of Today and Other Seminal Essays Bernard Nsokika Fonlon, 2012 This book brings together six seminal essays by Professor Bernard Nsokika Fonlon essays first published mostly in the 1960s in ABBIA Cameroon Cultural Review and in the pages of leading newspapers in Cameroon Preoccupied with the cultural dignity humanity and freedom of Africa and Africans Fonlon never contented himself with stating the problem In a very Socratic and scientifically systematic approach he proposed solutions as well Patiently pedagogical philosophical and steeped in the classics he convinced his readers through the force of argument In The Task of Today Fonlon invites Cameroonians and Africans to face the challenge of nation building and development in a world where imperialism is far from dead and buried Random Leaves from My Diary shares his aspirations and challenging experiences as a young seminarian learning to be relevant to God and the Catholic Church In Will We Make or Mar Fonlon is worried and indeed frustrated by the temptations of material pursuits and the love of money threatening to derail modern elites charged with the postcolonial destiny of African nations As a member of the Cameroon National Union in Under the Sign of the Rising Sun Fonlon preaches patriotism and compromise In Idea of Literature Fonlon expresses his passion for art as the pursuit of beauty and the sublime stressing as he was wont to do that no race or culture has a monopoly of this aspiration A Case for Early Bilingualism invites Cameroonians to take advantage of their English and French linguistic colonial heritage by embracing bilingualism in early childhood and playing a major role in an interconnected world where interpretation and translation is eternally needed Greek Sculpture and Modern Art Sir Charles Waldstein, 1914 A.I.F.
