Designs of Destruction Lucia Allais, 2018-10-16 How historical preservation efforts to protect architectural monuments arose in the twentieth century The twentieth century was highly destructive but from its landscapes of ruins was born a new architectural type the cultural monument In the wake of World War I an international movement arose which aimed to protect architectural monuments in large numbers and regardless of style hoping not only to keep them safe from future conflicts but also to make them worthy of protection from more quotidian forms of destruction An evolving group including architects intellectuals art historians archaeologists curators and lawyers grew out of the new diplomacy of the League of Nations During and after World War II it became affiliated with the Allied Military Government and was eventually absorbed by the UN as UNESCO By the 1970s this organization had begun granting World Heritage status to a global register of significant sites from buildings to bridges shrines to city centers ruins to colossi Examining key episodes in the history of this preservation effort including projects for the Parthenon the Cathedral of St L the temples of Abu Simbel and the Bamyian Buddhas Lucia Allais demonstrates how the group deployed the notion of culture to shape architectural sites and how architecture in turn shaped the very idea of global culture *Designs of Destruction* emphasizes how the technical project of ensuring various buildings longevity jolted preservation into establishing a transnational set of codes values and practices At the same time this paradoxically helped integrate technologies of destruction from bombs to bulldozers into cultural governance *Designs of Destruction* not only offers a fascinating narrative of cultural diplomacy based on extensive archival findings it also contributes an important new chapter in the intellectual history of modernity by showing the manifold ways architectural form is charged with concretizing abstract ideas and ideals even in its destruction

Arnold, 1997 Five distinguished scholars here summarize the state of current knowledge about ancient Egyptian temples and the rituals associated with their use The first volume in English to survey the major types of Egyptian temples from the Old Kingdom to the Roman period it offers a unique perspective on ritual and its cultural significance The authors perceive temples as loci for the creative interplay of sacred space and sacred time They regard as unacceptable the traditional division of the temples into the categories of mortuary and divine believing that their functions and symbolic representations were at once too varied and too intertwined Both informative to scholars and accessible to students the book combines descriptions of specific temples with new insights into their development and purposes
