Composing Questions Hadas Kotek, 2019-02-19 An investigation of the syntax and semantics of wh questions through the lens of intervention effects offering a new proposal on overt and covert wh movement In this book Hadas Kotek investigates the syntax and semantics of wh questions offering a new solution to a central question in the study of interrogatives given that overt wh movement is cross linguistically common is syntactic movement a prerequisite for the interpretation of wh phrases Some linguists argue that all wh phrases undergo movement to interrogative C even if covertly others propose mechanisms of in situ interpretation that do not require any movement Kotek moves beyond these positions to argue that wh in situ does move covertly but not necessarily to C Instead she contends wh in situ undergoes a short movement step akin to covert scrambling This makes the LF behavior of English parallel to the overt behavior of German Kotek presents a series of self paced reading experiments alongside judgment data from German to substantiate the idea of covert scrambling She introduces new diagnostics for the underlying structure of questions using as a principal tool the distribution of intervention effects This system allows her to offer the first unified account for a range of phenomena of interrogative syntax semantics as pied piping superiority effects the cross linguistically varied syntax of questions and intervention effects Kotek develops a theory of interrogative syntax semantics studies the phenomena of intervention effects in wh questions proposing that the nature of intervention is crucially tied to the availability of wh

movement in a question and shows that covert wh movement should be modeled as a short scrambling operation rather than an unbounded successive cyclic and potentially long distance movement operation *Economic and Social Conditions in Puerto Rico: Puerto Rico, Feb. 10-13, 15-17, 19, 1943* United States.
