MOVIE COLLECTOR S WORLD The Outrider Richard Harding,1984 Apocalypse now TIME The not too distant future
PLACE The United States of America Cities lie in twisted ruins The earth smolders and burns Men live in sewers In this
violence ravaged world there is just one law left the law of survival Amid the chaos and the ashes one man refuses to bow

armed to the teeth he roams the nightmare land searching Pg 4 of cover *Nuclear Holocausts* Paul Brians,1987 The
anxiety caused by the thought of nuclear war causes some people to avoid the topic altogether some to despair and others to
place unwarranted confidence in scientific or governmental control However the vivid characters and realistic settings of
fiction can bring home the impact of a nuclear war in a way that makes the topic difficult to avoid and allows readers to
confront their fears and phobias This bibliography study is the only compilation of its kind to deal exclusively with nuclear
war in fiction The first five chapters provide a historical survey of the development of the nuclear war theme and a study of
the causes and aftermath of nuclear war as treated in literature In addition Brians considers the significant failure of some
works to confront the subject and the success of others as educational tools With a clear focus on the subject of war this work
does not deal with such related topics as nuclear accidents reactor disasters or near war situations The bulk of the book is
given over to the detailed annotated bibliography which consists of over 800 entries with associated checklists Intended to
provide scholars librarians and general readers with ready access to a great variety of information about his body of writing
the bibliography lists both hardcover and paper editions of books and the reprinting of each short story and corrects several
errors in other standard reference works In his critical analysis and through the annotations in the bibliography Brians
attempts to improve our understanding of cultural attitudes toward the dangers posed by the ever present reality of nuclear
