**Beyond Trauma: Hope and Healing for Warriors** Dean Bonura, 2016-03-03. It is estimated that well over 250,000 military veterans from Iraq and Afghanistan are suffering today from PTSD, and even more from post-traumatic stress or PTS. Clinical interventions alone do not adequately address all the issues associated with PTSD. There is also a profound spiritual dimension to trauma, and it is frequently manifested in post-trauma symptoms such as guilt, grief, and shame, and in various forms of loss, including loss of meaning, loss of faith, and loss of peace. Pastors, chaplains, and Christian counselors have a legitimate healing role alongside clinicians in addressing the spiritual aspects of trauma through spiritual interventions that are based on Scripture and leverage new ways of viewing trauma and assumptions about its meaning. *Beyond Trauma: Hope Healing for Warriors* equips pastors, chaplains, and other pastoral caregivers with the knowledge and resources to not only understand the spiritual effects of trauma but to make appropriate interventions that will lead veterans in their churches and communities to healing and growth.

**The Rise of Asian Donors** Jin Sato, Yasutami Shimomura, 2013-05-07. Why do poor countries give aid to others? This book critically examines how aspirations for providing aid have coexisted with experiences of receiving aid and have transformed the practice of giving aid, with particular reference to the experiences of Japan and China. It highlights the historical sources that explain the pattern and strength of foreign aid that these new donors provide. The book has systematically examined the situation unique to middle-income countries that

are receiving and giving aid simultaneously It sheds light on the endogenous elements embedded in the socio economic conditions of emerging donors as well as their learning process as aid recipients This book examines not only the perspectives of recipients but also those of donors Japan in the case of China and the USA and the World Bank in the case of Japan By bringing in the donor s perspective we come to a holistic understanding of foreign aid as a product of interaction between the various agents involved The book provides not only an in depth case study of Japan from a historical perspective but also stretches its scope to cover contemporary debates on emerging donors including China India and Korea who have received substantial amount of aid from Japan in the past This book connects the often separated discussion of Japanese aid and the way it developed in relation to outside forces In short this book represents the first attempt to empirically examine the life of a donor with a clear focus on the origins struggles and futures of non western donors and their impact on established aid regime
