The Jigalong Mob: Aboriginal Victors of the Desert Crusade Robert Tonkinson, 1974 **Ecopsychology** Peter H. Kahn (Jr.), Patricia H. Hasbach, 2012 This book takes on that challenge and proposes a reenvisioned ecopsychology Semantics, Culture, and Cognition Anna Wierzbicka, 1992 This study ranges across a wide variety of languages and cultures in an attempt to identify concepts which are truly universal and to explore whether certain words are culture specific **Mind, Body and Culture** Geoffrey Samuel, 1990-06-29 The author draws on his background in physics to suggest a scientific approach to aspects of human behaviour which have been traditionally described as cultural or social *Holding Yawulyu* Zohl Dé Ishtar, 2005 Holding Yawulyu is an historical account of Wirrimanu Balgo a profound insight into the pressures white culture exerts on Indigenous women and their law It is a touching personal story of courage and resilience in the face of adversity Zohl d Ishtar presents an insightful analysis of competing interests that makes Indigenous and White interactions complex often painful and fraught problems Back cover Art or Scribbles? In the Eye of the Beholder: The Evolutionary Emergence of Visual Communication Iain Davidson, 2025-09-08 The book is about how art arose and how it became what we call art today How did art emerge from the relationships between people and the things they produce and the ideas of producers How do people manipulate those relationships in their own society How do outsiders work out the ways in which those relationships were used to make art What is art and why are all people engaged with it in one way or another From its very beginning and everywhere art has always been embedded in its cultural context the contexts of the people who made and see it and that context has often been ritual The history of art confused social and institutional changes of view because western critics or artists sought to define the boundaries of art so tightly that ritual purposeful or utilitarian works were excluded from it In their definition art only existed if the rituals of the original producers were stripped from the works or if the objects were appropriated away from the situation in which they were produced The objects stripped from their context could then only be valued for their aesthetics Art consists of relationships between people things and ideas in quite specific ways Those relationships are discussed at length in this book The book is aimed at artists art historians and archaeologists but also at the general public interested in art It is intended both for people whose interest in art comes from knowledge of the art of all continents and for those who have no knowledge *A Companion to Rock Art* Jo McDonald, Peter Veth, 2012-06-22 This unique guide provides an artistic and archaeological journey deep into human history exploring the petroglyphic and pictographic forms of rock art produced by the earliest humans to contemporary peoples around the world Summarizes the diversity of views on ancient rock art from leading international scholars Includes new discoveries and research illustrated with over 160 images including 30 color plates from major rock art sites around the world Examines key work of noted authorities e g Lewis Williams Conkey Whitley and Clottes and outlines new directions for rock art research Is broadly international in scope identifying rock art from North and South America Australia the Pacific Africa India Siberia

Soul, Self, and Society Michael Rynkiewicz, 2012-01-05 Globalization and urbanization are twin forces that are powerfully shaping economics politics and religion in the world today Traditional anthropological theories are inadequate to recognize and analyze trends such as global migration diasporas and transnationalism New departures in anthropology and the social sciences seeking to address these and other phenomena can help us critique and reshape the theology and practice of Christian mission Today most societies are no longer monocultural In such multicultural contexts any given individual may be competent in several cultures several languages several social networks What does it mean to be in mission with people on the move people who present themselves in one social identity language and culture within a particular setting and then in another setting even on the very same day present themselves in another social identity language and culture In the face of widespread rapid movement of peoples and their increasingly fluid and multifaceted identities will the missionary settle down somewhere or be itinerant along with the people How are perplexing new questions in particular contexts to be addressed such as In what ways is the Nigerian who is founding an AIC congregation near Houston a missionary too How will Brazilians and Koreans be trained for cross cultural ministry The world is changing faster than missionaries can be retrained for service And yet ethnographic tools are still crucial to missionary practice This important work seeks to draw on recent developments in anthropology to bring valuable perspective and tools to bear on equipping missionaries for work amidst the rapid shifting and complex shaping of peoples by the forces of today's globalized world

Seasonality in Primates Diane K. Brockman,Carel P. van Schaik,2005-11-17 The emergence of the genus Homo is widely linked to the colonization of new highly seasonal savannah habitats However until recently our understanding of the possible impact of seasonality on this shift has been limited because we have little general knowledge of how seasonality affects the lives of primates This book documents the extent of seasonality in food abundance in tropical woody vegetation and then presents systematic analyses of the impact of seasonality in food supply on the behavioural ecology of non human primates Syntheses in this volume then produce broad generalizations concerning the impact of seasonality on behavioural ecology and reproduction in both human and non human primates and apply these insights to primate and human evolution Written for graduate students and researchers in biological anthropology and behavioural ecology this is an absorbing account of how seasonality may have affected an important episode in our own evolution
