The Phantom Arm:

The Psychomatrix Doreen M. Francis, 2018-05-08 What is pain What does it mean to have a relationship with it and how does this affect your identity and existence The author's definition of pain is derived from that proposed by scientists such as Melzack Wall and Freud Pain is a dynamic multi layered diverse collection of experiences which impacts and influences us throughout life Pain is a kind of conglomerate of past traumatic neurobiological psychological and emotional imprints pain as in suffering or being in pain The author argues that it is not pain as such but our relationship with pain which is most significant to the processes of our lives In examining the combination of Freud's psychosexual theory of development and Melzack's theory of the neuromatrix the author endeavours to evidence her theory that there is the distinct possibility for the existence of what she has named a Psychomatrix patterns of pain loss abandonment grief rejection desire imprinted from infancy

The Mind-brain Continuum Rodolfo Riascos Llinás, Patricia Smith Churchland, 1996 Bringing together contributors working on a common problem but addressing different levels of brain organization by way of different techniques The Mind Brain Continuum seeks to determine which scientific questions are most pressing as we move toward discovering the neurobiology of psychological processes As the title implies contributions are organized around the notion that mental activity is brain activity providing a broad integrated view of a particular subset of brain function The focus is on sensory perception processes that include somatosensory auditory and olfactory processes as well as research on vision

A Philosophy of Person and Identity Monica Meijsing, 2022-08-04 This book discusses the themes of personhood and personal identity It argues that while there is a metaphysical answer to the question of personal identity there is no metaphysical answer to the question of what constitutes a person The author argues against both body mind dualism and physicalism and also against the idea that there is some metaphysically real category of persons distinct from the category of human beings or human organisms Instead the author presents neutral monist autopoietic enactivist kind of metaphysics of the human being and a relational and completely human dependent notion of a person The tools used in these arguments include conceptual argumentation and empirical case studies Using both personal experiences and studies of cultures all over the world the author examines dualism between mind and body The author discusses real people who seem to live a Cartesian life as somehow disembodied minds as well as the concept of the person The author uses the concluding

chapters to present their own views arguing that questions about our identity should be separated from questions of our personhood as well as the concept of personhood This volume is of interest to scholars of philosophy of mind **The Mythomanias** Michael S. Myslobodsky,2013-06-17 Recently there has been a renewal of interest in the broad and loosely bounded range of phenomena called deception and self deception This volume addresses this interest shared by philosophers social and clinical psychologists and more recently neuroscientists and cognitive scientists Expert contributors provide timely reliable and insightful coverage of the normal range of errors in perception memory and behavior They place these phenomena on a continuum with various syndromes and neuropsychiatric diseases where falsehood in perception self perception cognition and behaviors are a peculiar sign Leading authorities examine the various forms of mythomania deception and self deception ranging from the mundane to the bizarre such as imposture confabulations minimization of symptomatology denial and anosognosia Although the many diverse phenomena discussed here share a family resemblance they are unlikely to have a common neurological machinery In order to reach an explanation for these phenomena a reliable pattern of lawful behavior must be delineated It would then be possible to develop reasonable explanations based upon the underlying neurobiological processes that give rise to deficiencies designated as the mythomanias The chapters herein begin to provide an outline of such a development Taken as a whole the collection is consistent with the emerging gospel indicating that neither the machinery of nature nor the forces of nurture taken alone are capable of explaining what makes cognition and behaviors aberrant **The Behavioral and Cognitive Neurology of Stroke** Olivier Godefroy,2013-02-28 Practical for clinical use this book contains diagnosis and management strategies for all disorders observed in stroke patients **The Subject's Matter** Frederique De Vignemont,Adrian J. T. Alsmith,2017-12-15 An interdisciplinary and comprehensive treatment of bodily self consciousness considering representation of the body the sense of bodily ownership and representation of the self The body may be the object we know the best It is the only object from which we constantly receive a flow of information through sight and touch and it is the only object we can experience from the inside through our proprioceptive vestibular and visceral senses Yet there have been very few books that have attempted to consolidate our understanding of the body as it figures in our experience and self awareness This volume offers an interdisciplinary and comprehensive treatment of bodily self awareness the first book to do so since the landmark 1995 collection *The Body and the Self* edited by Jos Berm dez Naomi Eilan and Anthony Marcel MIT Press Since 1995 the study of the body in such psychological disciplines as cognitive psychology cognitive neuroscience psychiatry and neuropsychology has advanced dramatically accompanied by a resurgence of philosophical interest in the significance of the body in our mental life The sixteen specially commissioned essays in this book reflect the advances in these fields The book is divided into three parts each part covering a topic central to an explanation of bodily self awareness representation of the body the sense of bodily ownership and representation of the self Contributors Adrian Alsmith Brianna Beck Jos Luis Berm dez Anna Berti Alexandre
