Rudes, 2022-03-22 Twenty to forty percent of the US prison population will spend time in restricted housing units or solitary confinement These separate units within prisons have enhanced security measures and thousands of staff control and monitor the residents Though commonly assumed to be punishment for only the most dangerous behaviors in reality these units may also be used in response to minor infractions In *Surviving Solitary* Danielle S Rudes offers an unprecedented look inside RHUs and a resounding call to more vigorously confront the intentions and realities of these structures As the narratives unfold we witness the slow and systematic damage the RHUs inflict upon those living and working inside through increased risk arbitrary rules and strained or absent social interactions Rudes makes the case that we must prioritize improvement over harm Residents uniformly call for more humane and dignified treatment Staff yearn for more expansive control But as Rudes shows there also remains fierce resilience among residents and staff and across the communities they forge and a perpetual hope that they may have a different future
