

The First Bicycles

The very first bicycles had no pedals at all. People made them go by pushing along the ground with their feet. A Frenchman called de Sivrac made the first successful bicycle ride around 1790. His bicycle looked like a rocking horse with wheels instead of rocks.

Nearly 50 years later, in Germany, Karl von Drais made a machine that looked much more like the bicycle we know. It had a front wheel that could be turned for steering (although Sivrac's could too, but it was hard to be turned going with the feet). This machine was called the *velocipede*, or *hobbyhorse*, or *draisienne*, and it was quite popular in France and England for a few years.

Pedals on the hobbyhorse

One of the first people to put pedals on a hobbyhorse was a Scottish blacksmith called Kirkpatrick Macmillan. Around 1840, he made a bicycle which was worked by putting pedals backwards and forwards. Macmillan used a chain, but no one else seemed very interested at the time.

The bicycle industry begins

The bicycle industry really began 20 years later when two American put pedals and pedals on the front wheel of a hobbyhorse. The new machine seemed a lot of interest, and the two men, Pierre Michaux and his son Ernest, became well established as bicycle manufacturers.

Unfortunately, Pierre's business abilities did not match his mechanical skills. By 1870 he had sold his business to the Olivers, brothers that was continuing to make and sell bicycles under his main name (which he had agreed not to do). The pair said that followed broke him down financially and mentally and he died in 1880.

The craze for hobbyhorses

People became wildly enthusiastic about hobbyhorses when it was introduced to Paris in 1817.

There is always someone who is ready to make fun of a new craze. George Leveillé, who was a well known cartoonist of the time, was making fun of hobbyhorses when he drew these pictures. The drawings show a type of hobbyhorse in each week's issue.
