sports stories to discuss race relations and cultural politics to Joyce Litton's analysis of the highly popular Sisterhood of the Traveling Pants Quartet. The cover illustration is done by Joel Rudinger based on his experiences with the Inuit where he learned many of their legends and myths resulting in his own excellent work on Sedna the creation goddess a story filled with deep tragedy mystery and the world of the spirits. This mythic world slides into the discussion of Harry Eiss one that focuses on The Isis Trilogy best known of Monica Hughes many works who writes Science fiction and fantasy in particular are valid carriers of myth for the 20th century and most especially for young people. Margaret Best and Susann deVries also give us literature that uses science. They begin The science fair project is the central metaphor and the reality in Paul Zindel's The Effect of Gamma Rays on Man in the Moon Marigolds 1970. Christopher Paul Curtis's Bucking the Sarge 2004 and Joyce Maynard's The Cloud Chamber 2005. After providing an overview science fiction Sally Sugarman offers a study of the entire genre. For this study two hundred and thirty nine high school students from two schools in Vermont and Massachusetts were surveyed. Alethea K Helbig provides an overview of her important activities promoting literature for the young. She was a seminal scholar and educator when colleges and universities were just beginning to take the study of such literature seriously when English departments were initiating serious undergraduate and graduate classes in what previously had been seen as inferior literature. Her life itself provides us with an entertaining and historically valuable autobiographical account of a person at the center of the change that has taken and continues to take place. Jerry Loving expands the horizons of the entire collection of essays providing a firsthand account of how the young are educated in China including a detailed history. It begins I have been traveling to mainland China at least 4 to 6 times a year as a teacher or education evaluator since 2002. As the visits and years passed I watched the education system of China slowly improve to the level my schools were like when I went to school in the 50's and 60's.

Unsettling Narratives Clare Bradford, 2007-04-26. Children's books seek to assist children to understand themselves and their world. *Unsettling Narratives: Postcolonial Readings of Children's Literature* demonstrates how settler society texts position child readers as citizens of postcolonial nations how they represent the colonial past to modern readers what they propose about race relations and how they conceptualize systems of power and government. Clare Bradford focuses on texts produced since 1980 in Canada the United States Australia and New Zealand and includes picture books novels and films by Indigenous and non Indigenous publishers and producers. From extensive readings the author focuses on key works to produce a thorough analysis rather than a survey. *Unsettling Narratives* opens up an area of scholarship and discussion the use of postcolonial theories relatively new to the field of children's literature and demonstrates that many texts recycle the colonial discourses naturalized within mainstream cultures.

Young Adult Science Fiction C. W. Sullivan III,1999-03-30 At the close of the nineteenth century American youths developed a growing interest in electricity and its applications machines and gadgetry When authors and publishers recognized the extent of this interest in technology they sought to create reading materials that would meet this market need The result was science fiction written especially for young adults While critics tended to neglect young adult science fiction for decades they gradually came to recognize its practical and cultural value Science fiction inspired many young adults to study science and engineering and helped foster technological innovation At the same time these works also explored cultural and social concerns more commonly associated with serious literature Nor was young adult science fiction a peculiarly American phenomenon authors in other countries likewise wrote science fiction for young adult readers This book examines young adult science fiction in the U S and several other countries and explores issues central to the genre The first part of the book treats the larger contexts of young adult science fiction and includes chapters on its history and development Included are discussions of science fiction for young adults in the U S and in Canada Great Britain Germany and Australia These chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present The second section of the book considers topics of special interest to young adult science fiction Some of the chapters look at particular forms and expressions of science fiction such as films and comic books Others treat particular topics such as the portrayal of women in Robert Heinlein s works and representations of war in young adult science fiction Yet another chapter studies the young adult science fiction novel as a coming of age story and thus helps distinguish the genre from science fiction written for adult readers All chapters reflect current research and the volume concludes with extensive bibliographies
