The Journal of Interdisciplinary History ,1977 **The Journal of Interdisciplinary History. The History of the Family, III.** ,1975 **Poisons of the Past** Mary Allerton Kilbourne Matossian,1989-01-01 Did food poisoning cause the Black Plague the Salem witch hunts and other significant events in human history In this pathbreaking book historian Mary Kilbourne Matossian argues that epidemics sporadic outbursts of bizarre behavior and low fertility and high death rates from the fourteenth to the eighteenth centuries may have been caused by food poisoning from microfungi in bread the staple food in Europe and America during this period A bold book with a stimulating thesis Matossian s claims for the role of food poisoning will need to be incorporated into any satisfactory account of past demographic trends John Walter Nature
Matossian s work is innovative and original modest and reasoned and opens a door on our general human past that historians have not only ignored but often did not even know existed William Richardson Environmental History Review This work demonstrates an impressive variety of cross national sources Its broad sweep also reveals the importance of the history of agriculture and food and strengthens the view that the shift from the consumption of mold poisoned rye bread to the potato significantly contributed to an improvement in the mental and physical health of Europeans and Americans Naomi Rogers Journal of American History This work is a true botanical historical tour de force Rudolf Schmid Journal of the International Association of Plant Taxonomy Intriguing and lucid William K Beatty Journal of the American Medical Association Journal of Interdisciplinary History ,1970 **The Burdens of Disease** J. N. Hays,1998 In this sweeping approach to the history of disease historian J N Hays chronicles perceptions and responses to plague and pestilence over two thousand years of western history Hays frames disease as a multi dimensional construct situated at the intersection of history politics culture and medicine and rooted in mentalities and social relations as much as in biological conditions of pathology He shows how diseases affect social and political change reveal social tensions and are mediated both within and outside the realm of scientific medicine Beginning with the legacy of Greek Roman and early Christian ideas about disease the book then discusses many of the dramatic epidemics from the fourteenth through the twentieth centuries moving from leprosy and bubonic plague through syphilis smallpox cholera tuberculosis influenza and poliomyelitis to AIDS Hays examines the devastating exchange of diseases between cultures and continents that ensued during the age of exploration He also describes disease through the lenses of medical theory public health folk traditions and government response The history of

epidemics is also the history of their victims Hays pays close attention to the relationships between poverty and power and disease using contemporary case studies to support his argument that diseases concentrate their pathological effects on the poor while elites associate the cause of disease with the culture and habits of the poor *Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ... Chronicling Poverty Tim Hitchcock, Pamela Sharpe, Peter King, 1997-03-15 Over the last twenty years more and more historians of the eighteenth and early nineteenth centuries have turned their eyes away from the records of central administration towards local archives and the lives of the poor What they have found is a wealth of sources some of which chronicle the lives and many of which record the words of working people This book will bring together some of the best work based on these sources *Victorian Labour History* John Host, 2002-11-01 First Published in 2004 In Victorian Labour History Experience Identity and the Politics of Representation John Host addresses liberal Marxist and postmodernist historiography on Victorian working people to question the special status of historical knowledge The central focus of this study is a debate about mid Victorian social stability a condition conventionally equated with popular acceptance of the social order Host does not join the debate but takes it as his object of analysis deconstructing the notion of stability and the analyses that purport to explain it In particular he takes issue with historical evidence noting the different possibilities for meaning that it allows and the speculative character of the narratives to which it is adduced Host examines an extensive range of archival material to illustrate the ambiguity of the historical field the rhetorical strategies through which the illusion of its unity is created and the ultimately fictive quality of historical narrative He then explores the political contingency of the works he addresses and the political consequences of representing them as true *Handbook of Cliometrics* Claude
