The Peter Prescription How To Make Things Go Right:

THE PETER PRESCRIPTION HOW TO MAKE THINGS GO RIGHT DR. LAURENCE J. PETER, 1972 **Ethics Protocols and Research Ethics Committees** D. Remenyi, Nicola Swan, Ben Van Den Assem, 2011

Conducting research to high ethical standards is of great importance to the student and the university. Having an Ethics Protocol is the way of ensuring such standards can be met. Researching with the use of an approved Ethics Protocol also affords protection to the student. Many research degree candidates need advice to help complete an application for the approval of their Ethics Protocol. This book shows how to do this in a practical and effective way. The book provides background on the issue of research ethics to help students and faculty have a greater understanding of the motivations behind the requirements to write an application to the Ethics Committee for the approval of an Ethics Protocol. The process of ethics approval and the function of the Ethics Committee are addressed along with how to cope with amendments to an Ethics Protocol. The book draws on the work of the authors who have had direct experience with Ethics Committees and helping students comply with the requirements.

Back cover *The Measure of a Leader* Robert I. Mann, 2013-03-26

What makes a great leader? Personality? A response to the demands of time and circumstance? Where is leadership located in modern organizations? Has it a place in the management of corporate enterprise? What contributes to a leader's control? These and many other questions are explored in the theoretical background of this work. An examination of twentieth-century theories about the sources of personal powers, the social forces that enabled it, the psychological roots of leader relationships, the ingredients of leader style and quality, and the conduct identified as a leader's behaviors is directed at identifying the measurable elements of this social phenomenon. Three chapters document experimental attempts to analyse leader performance, recognizing form, style and quality in quantifiable detail. The use of descriptive questionnaires as means of labeling leader performance and quantifying its characteristics provides definitive insights into the nature of this social phenomenon. Finally, a unique system for leader appraisal, the Leader Appraisal Questionnaire (LAQ), based upon sound theoretical principles and twenty years of experimental research with the questionnaire methodology, is detailed. This novel system, adaptable to all kinds of organizations and enterprises, provides a unique tool for leadership evaluation and development. Given that leadership is a primary consideration in all kinds of organizational pursuits, this book is a must for every major institutional and corporate executive office, every government administration, institutions of higher learning and research, and any person who wishes to undertake and make success of a group enterprise.
