Firestone,2016-04-22 This book examines the transcendental dimension of Kant s philosophy as a positive resource for theology Firestone shows that Kant s philosophy establishes three distinct grounds for transcendental theology and then evaluates the form and content of theology that emerges when Christian theologians adopt these grounds To understand Kant s philosophy as a completed process Firestone argues theologians must go beyond the strictures of Kant s critical philosophy proper and consider in its fullness the transcendental significance of what Kant calls rational religious faith This movement takes us into the promising but highly treacherous waters of Kant s Religion within the Boundaries of Mere Reason to understand theology at the transcendental bounds of reason *The Philosophy of Kant Explained (Classic Reprint)* John Watson,2017-12-15 Excerpt from *The Philosophy of Kant Explained* Preface Introduction Transcendental Aesthetic Section I Space Section II Time General Remarks on the Transcendental Aesthetic Transcendental Logic Transcendental Analytic About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Critique of Pure Reason* Immanuel Kant,2017-07-20 *The Critique of Pure*

Reason 1781 second edition 1787 is a book by Immanuel Kant that is considered one of the most influential works in the history of philosophy Also referred to as Kant's First Critique it was followed by the Critique of Practical Reason 1788 and the Critique of Judgment 1790 In the preface to the first edition Kant explains what he means by critique of pure reason stating I do not mean by this a critique of books and systems but of the faculty of reason in general in respect of all knowledge after which it may strive independently of all experience The Critique is an investigation into the foundations and limits of human knowledge and the extent to which the human mind is able to engage in metaphysics Kant builds on the work of empiricist philosophers such as John Locke and David Hume as well as rationalists such as Gottfried Wilhelm Leibniz and Christian Wolff He expounds new ideas on the nature of space and time and claims to provide solutions to Hume's scepticism regarding human knowledge of the relation of cause and effect and René Descartes' scepticism regarding knowledge of the external world Kant claims to enact a Copernican revolution in philosophy with his doctrine of transcendental idealism according to which our knowledge does not conform to objects but rather objects conform to our knowledge According to Kant's doctrine the human mind shapes and structures the world of experience making knowledge possible Knowledge independent of experience Kant calls a priori knowledge while knowledge obtained through experience is termed a posteriori According to Kant a proposition is a priori if it is necessary and universal A proposition is necessary if it could not possibly be false and so cannot be denied without contradiction A proposition is universal if it is true in all cases and so does not admit of any exceptions Knowledge gained a posteriori through the senses Kant argues never imparts absolute necessity and universality because it is always possible that we might encounter an exception Kant claims to have discovered another attribute of propositions the distinction between analytic and synthetic judgments According to Kant a proposition is analytic if the content of the predicate concept of the proposition is already contained within the subject concept of that proposition For example Kant considers the proposition All bodies are extended analytic since the predicate concept extended is already contained within or thought in the subject concept of the sentence body The distinctive character of analytic judgements was therefore that they can be known to be true simply by an analysis of the concepts contained in them they are true by definition In synthetic propositions on the other hand the predicate concept is not already contained within the subject concept For example Kant considers the proposition All bodies are heavy synthetic since the concept body does not already contain within it the concept weight Synthetic judgments therefore add something to a concept whereas analytic judgments only explain what is already contained in the concept Prior to Kant it was thought that all a priori knowledge must be analytic Kant however argues that our knowledge of mathematics of the first principles of natural science and of metaphysics is both a priori and synthetic The peculiar nature of this knowledge Kant argues cries out for explanation The central problem of the Critique is therefore to answer the question How are synthetic a priori judgements possible It is a matter of life and death to metaphysics and to human reason Kant argues that the grounds of this kind of knowledge be explained *The Philosophy of*

Immanuel Kant's the Critique of Pure Reason Immanuel

Kant,2017-01-01 The Critique of Pure Reason German Kritik der reinen Vernunft KrV by Immanuel Kant first published in 1781 second edition 1787 is one of the most influential works in the history of philosophy Also referred to as Kant's First Critique it was followed by the Critique of Practical Reason 1788 and the Critique of Judgment 1790 In the preface to the first edition Kant explains what he means by a critique of pure reason I do not mean by this a critique of books and systems but of the faculty of reason in general in respect of all knowledge after which it may strive independently of all experience Dealing with questions concerning the foundations and extent of human knowledge Kant builds on the work of empiricist philosophers such as John Locke and David Hume as well as taking into account the theories of rationalist philosophers such as Gottfried Wilhelm Leibniz and Christian Wolff Kant expounds new ideas on the nature of space and time and claims to solve the problem which Hume posed regarding human knowledge of the relation of cause and effect and to have assessed the ability of the human mind to engage in metaphysics Knowledge independent of experience is referred to by Kant as a priori knowledge while knowledge obtained through experience is termed a posteriori According to Kant a priori knowledge expresses necessary truths Statements which are necessarily true cannot be negated without becoming false Examples provided by Kant include the propositions of mathematics propositions from the understanding in its quite ordinary employment such as Every alteration must have a cause as well as propositions from natural science physics such as in all changes in the material world the quantity of matter remains unchanged Kant believed that he had discovered another attribute of propositions which allowed him to frame the problem of a priori knowledge in a new way the distinction between analytic and synthetic judgments According to Kant to say that a sentence is analytic is to say that what is stated in the predicate concept of the sentence is already contained albeit covertly in the subject concept of that sentence The example he provides is the sentence All bodies are extended which is analytic since the predicate concept extended is already contained in or thought in the subject concept of the sentence bodies Kant considered the judgment All bodies are heavy synthetic since I do not include in the concept of body in general the predicate weight Synthetic judgments therefore add something to a concept whereas analytic judgments only explain what is already contained in the concept The distinctive character of analytic judgments was therefore that they can be known to be true simply by an analysis of the concepts contained in them or alternatively are true by definition Prior to Kant it was thought that all necessary truth had the character of being analytic Kant argued that not all necessary truths are analytic but that some of them are synthetic Having explained that the basis of analytic judgments lies in the principle of contradiction or the principle of identity the task he set out to achieve in the Critique of Pure Reason was to explain the grounds of those judgments which are necessary and synthetic and these he termed a priori synthetic judgments
